What Is Global History? Sebastian Conrad, 2017-08-29 The first comprehensive overview of the innovative new discipline of global history Until very recently historians have looked at the past with the tools of the nineteenth century But globalization has fundamentally altered our ways of knowing and it is no longer possible to study nations in isolation or to understand world history as emanating from the West This book reveals why the discipline of global history has emerged as the most dynamic and innovative field in history one that takes the connectedness of the world as its point of departure and that poses a fundamental challenge to the premises and methods of history as we know it What Is Global History provides a comprehensive overview of this exciting new approach to history The book addresses some of the biggest questions the discipline will face in the twenty first century How does global history differ from other interpretations of world history How do we write a global history that is not Eurocentric yet does not fall into the trap of creating new centrism How can historians compare different societies and establish compatibility across space What are the politics of global history This in depth and accessible book also explores the limits of the new paradigm and even its dangers the question of whom global history should be written for and much more Written by a leading expert in the field What Is Global History shows how by understanding the world s past as an integrated whole historians can remap the terrain of their discipline for our globalized present *A Global History of Runaways* Marcus Rediker, Titas Chakraborty, Matthias van Rossum, 2019-07-30 During global capitalism s long ascent from 1600 1850 workers of all kinds slaves indentured servants convicts domestic workers soldiers and sailors repeatedly ran away from their masters and bosses with profound effects A Global History of Runaways edited by Marcus Rediker Titas Chakraborty and Matthias van Rossum compares and connects runaways in the British Danish Dutch French Mughal Portuguese and American empires Together these essays show how capitalism required vast numbers of mobile workers who would build the foundations of a new economic order At the same time these laborers challenged that order from the undermining of Danish colonization in the seventeenth century to the igniting of civil war in the United States in the nineteenth **The Colonial World** Robert Aldrich, Andreas Stucki, 2022-12-29 The Colonial World A History of European Empires 1780s to the Present provides the most authoritative in depth overview on European imperialism available It synthesizes recent developments in the study of European empires and provides new perspectives on European colonialism

and the challenges to it With a post 1800 focus and extensive background coverage tracing the subject to the early 1700s the book charts the rise and eclipse of European empires Robert Aldrich and Andreas Stucki integrate innovative approaches and findings from the new imperial history and look at both the colonial era and the legacies it left behind for countries around the world after they gained independence Dividing the text into three complementary sections Aldrich and Stucki offer an original approach to the subject that allows you to explore Different eras of colonisation and decolonisation from early modern European colonialism to the present day Overarching themes in colonial history like land and sea the body and representations of colonialism A global range of snapshot colonial case studies such as Peru 1780 India 1876 The South Pacific 1903 the Dutch East Indies 1938 and the Portuguese empire in Africa 1971 This is the essential text for anyone seeking to understand the nature and complexities of modern European imperialism and its aftermath The Oxford Handbook of Commodity History Jonathan Curry-Machado, Jean Stubbs, William Gervase Clarence-Smith, Jelmer Vos, 2024 The Oxford Handbook of Commodity History features contributions from scholars involved in the field s development across a range of countries and linguistic regions Each of the handbook s thirty one chapters focuses on an important theme within commodity history essential approaches global histories modes of production people and land environmental impact consumption and new methodologies *Ottoman Egypt and the Emergence of the Modern World* Nelly Hanna, 2014-09-01 Aiming to place Egypt clearly in the context of some of the major worldwide transformations of the three centuries from 1500 to 1800 Nelly Hanna questions the mainstream view that has identified the main sources of modern world history as the Reformation the expansion of Europe into America and Asia the formation of trading companies and scientific discoveries Recent scholarship has challenged this approach on account of its Eurocentric bias on both the theoretical and empirical levels Studies on India and southeast Asia for example reject the models of these regions as places without history as stagnant and in decline and as awakening only with the emergence of colonialism when they became the recipients of European culture and technology So far Egypt and the rest of the Ottoman world have been left out of these approaches Nelly Hanna fills this gap by showing that there were worldwide trends that touched Egypt India southeast Asia and Europe In all these areas for example there were linguistic shifts that brought the written language closer to the spoken word She also demonstrates that technology and know how far from being centered only in Europe flowed in different directions in the eighteenth century French entrepreneurs were trying to imitate the techniques of bleaching and dyeing of cloth that they found in Egypt and other Ottoman localities Based on a series of lectures given at the Middle East Center at Harvard this groundbreaking book will be of interest to all those looking for a different perspective on the history of south north relations

Cultural Change in Modern World History Peter N. Stearns, 2018-12-13 In this innovative textbook leading world historian Peter Stearns analyses key examples of culture change from around the world highlighting what culture change involves and how it can be explained and assessed both historically and in the contemporary world Culture change is one of

the most interesting and significant features of human society but until now there has been no book for the classroom which looks explicitly at this phenomenon Cultural Change in Modern World History covers different kinds and levels of culture change since 1500 from colonial culture contact in British India to modernization in Meiji Japan and changing attitudes towards gay marriage in the past decade considering how we should define culture change how to deal with causation and how to evaluate continuities and consequences Stearns addresses fundamental questions why do groups of people change their beliefs and values and what happens when they do Conversely why do some groups resist culture change and how do some manage to combine novel and more traditional cultural components Figuring out how better to understand why groups or societies change their minds or refuse to do so provides a crucial perspective on human behaviors and values As the first book to explore this important question Cultural Change in Modern World History is a ground breaking text for students of world history cultural history and anthropology *Atlas of Travel and Tourism Development* Myra Shackley, 2007-03-14 From travel in the ancient and classical world to the growth of underwater tourism in the Great Barrier Reef and the influence of the Gulf War on regional tourism the Atlas of Travel and Tourism Development is a new departure from conventional texts providing a unique overview of the growth of the tourism industry Divided into three sections the text looks first at the past examining the influence of global geography on travel patterns and provides an overview of the history of travel and tourism It then moves onto the present using a regional framework to demonstrate how the physical and historical geography of each area is related to tourism development The final section provides a forecast of future trends for the next two decades *A Companion to Global Environmental History* J. R. McNeill, Erin Stewart Mauldin, 2025-02-06 A COMPANION TO GLOBAL ENVIRONMENTAL HISTORY Equips both specialists and newcomers with the historical intellectual and political context for engagement with the environment Providing multiple points of entry into a dynamic fast growing field A Companion to Global Environmental History explores the many contours of the relationship between human societies and the natural world on which they depend Bringing together essays by an international roster of both established experts and emerging scholars this volume covers a uniquely broad range of temporal geographic thematic and contextual approaches to the practice of global environmental history Thirty three detailed chapters describe how the relationship between society and nature has changed over time examine the various drivers of change and environmental transformations survey different types of environmental thought and action around the world and more Now in its second edition the Companion is fully revised to reflect major research developments and new trajectories within the field Updated chapters that present new evidence for longstanding debates and innovative applications of environmental history are accompanied by six entirely new chapters on India China Africa early modern cities global environmental governance and European environmentalism Offering fresh insights into environmental thought culture policy and politics A Companion to Global Environmental History Second Edition is an ideal textbook for undergraduate and graduate students and an invaluable

Gareth Austin,Kaoru Sugihara,2013-09-13 The prevailing view of industrialization has focussed on technology capital entrepreneurship and the institutions that enabled them to be deployed Labour was often equated with other factors of production and assigned a relatively passive role Yet it was labour absorption and the improvement of the quality of labour over the course of several centuries that underscored the timing pace and quality of global industrialization While science and technology developed in the West and whereas the use of fossil fuels especially coal and oil were vital to this process the more recent history has been underpinned by the development of comparatively resource and energy saving technology without which the diffusion of industrialization would not have been possible The labour intensive resource saving path which emerged in East Asia under the influence of Western technology and institutions and is diffusing across the world suggests the most realistic route humans could take for a further diffusion of industrialization which might respond to the rising expectations of living standards without catastrophic environmental degradation *Reorienting the 19th Century* Andre Gunder Frank,Robert A. Denemark,2015-10-23 Andre Gunder Frank was a path breaking scholar in several disciplines over an illustrious and contentious 50 year career First amongst his many important works is the book ReORIENT Global Economy in the Asian Age which sought to correct a Euro centric world view of the development of the global political economy Frank passed away in April 2005 while working on this new book a sequel to ReORIENT In this book Frank shows many of the myths of European industrialisation hegemony and capitalism which have hidden the fact that Asia remained a serious power not just into the 18th century as Frank himself argued in 1998 but well into the 19th century as well When Frank passed away his colleagues rallied to finish this book and it is presented here as his final major statement The Relentless Revolution: A History of Capitalism Joyce Appleby,2011-03-07 Splendid the global history of capitalism in all its creative and destructive glory New York Times Book Review With its deep roots and global scope the capitalist system seems universal and timeless The framework for our lives it is a source of constant change sometimes measured and predictable sometimes drastic out of control Yet what is now ubiquitous was not always so Capitalism was an unlikely development when it emerged from isolated changes in farming trade and manufacturing in early modern England Astute observers began to notice these changes and register their effects Those in power began to harness these new practices to the state enhancing both A system generating wealth power and new ideas arose to reshape societies in a constant surge of change Approaching capitalism as a culture as a historical development that was by no means natural or inevitable Joyce Appleby gives us a fascinating introduction to this most potent creation of mankind from its origins to its present global reach Global Entanglements of a Man Who Never Traveled Dominic Sachsenmaier,2018-05-29 Born into a low level literati family in the port city of Ningbo the seventeenth century Chinese Christian convert Zhu Zongyuan likely never left his home province Yet Zhu nonetheless led a remarkably globally connected life His relations with the outside world ranging from scholarly activities to involvement

with globalizing Catholicism put him in contact with a complex and contradictory set of foreign and domestic forces In *Global Entanglements of a Man Who Never Traveled* Dominic Sachsenmaier explores the mid seventeenth century world and the worldwide flows of ideas through the lens of Zhu s life combining the local regional and global Taking particular aspects of Zhu s multiple belongings as a starting point Sachsenmaier analyzes the contexts that framed his worlds as he balanced a local life and his border crossing faith At the local level the book pays attention to the intellectual political and social environments of late Ming and early Qing society including Confucian learning and the Manchu conquest questioning the role of ethnic and religious identities At the global level it considers how individuals like Zhu were situated within the history of organizations and power structures such as the Catholic Church and early modern empires amid larger transformations and encounters A strikingly original work this book is a major contribution to East Asian transnational and global history with important implications for historical approaches and methodologies **The Struggle against Imperialism** Edward H.

Judge, John W. Langdon, 2018-06-15 This concise and engaging book argues that the Cold War and anti colonial movements should properly be studied and taught together not as distinct developments but rather as interwoven aspects of a complex global transformation The authors provide a cogent and concise description of the post World War II era and reveal connective dimensions of that era that remain hidden in books that focus primarily on either the Cold War or the struggles against imperial rule It not only deals with anti colonialism and Cold War together but also portrays the Cold War as a contest between anti imperialist empires capped by the collapse of one of them the multicultural trans regional Soviet realm in a work that is engaging and accessible to both students and general readers **The Contamination of the Earth**

Francois Jarrige, Thomas Le Roux, 2021-11-16 The trajectories of pollution in global capitalism from the toxic waste of early tanneries to the poisonous effects of pesticides in the twentieth century Through the centuries the march of economic progress has been accompanied by the spread of industrial pollution As our capacities for production and our aptitude for consumption have increased so have their byproducts chemical contamination from fertilizers and pesticides diesel emissions oil spills a vast plastic continent found floating in the ocean *The Contamination of the Earth* offers a social and political history of industrial pollution mapping its trajectories over three centuries from the toxic wastes of early tanneries to the fossil fuel energy regime of the twentieth century **Histories of Technology, the Environment and Modern Britain**

Jon Agar, Jacob Ward, 2018-04-09 *Histories of Technology the Environment and Modern Britain* brings together historians with a wide range of interests to take a uniquely wide lens view of how technology and the environment have been intimately and irreversibly entangled in Britain over the last 300 years It combines for the first time two perspectives with much to say about Britain since the industrial revolution the history of technology and environmental history Technologies are modified environments just as nature is to varying extents engineered Furthermore technologies and our living and non living environment are both predominant material forms of organisation and self organisation that surround and make us Both have

changed over time in intersecting ways Technologies discussed in the collection include bulldozers submarine cables automobiles flood barriers medical devices museum displays and biotechnologies Environments investigated include bogs cities farms places of natural beauty and pollution land and sea The book explores this diversity but also offers an integrated framework for understanding these intersections **Media and Society into the 21st Century** Lyn Gorman,David McLean,2009-02-17 Media and Society into the 21st Century captures the breathtaking revolutionary sweep of mass media from the late 19th century to the present day Updated and expanded new edition including coverage of recent media developments and the continued impact of technological change Newly reworked chapters on media war international relations and new media A new Web 2 0 section explores the role of blogging social networking user generated content and search media in media landscape A Global History of Christians Paul R. Spickard,Kevin M. Cragg,2001-02 Surveys the progression of the Christian experience within historical social economic and cultural contexts
