Thurston, 2009-08-03 Simon Mills had never actually planned to become a scientist But he hadn't managed to avoid the eventuality either As with most things in his life Simon's drift into academia just sort of happened the result of a series of coincidences and twists of fate over which he seemed to exert minimal control regardless of whatever alternative path he might have preferred So instead of spending his early twenties enjoying a slow predictable existence in the English countryside of his youth Simon finds himself first as a reluctant post graduate student in London working for a quintessentially eccentric professor and then and much to his chagrin propelled across the Atlantic to the USA to pursue some harebrained experiment or other All in the name of science Simon lurches from one unsolicited career opportunity to another finally getting himself caught up in an academic political battle going on half a world and a whole scientific dimension away from his own Not that distance or relevant experience appear to be factors when it comes to Simon Mills vocation It seems fortune just won't leave him alone Catalogue of Title-entries of Books and Other Articles Entered in the Office of the Librarian of Congress, at Washington, Under the Copyright Law ...
