state and in key respects has been so for many years The aim of this volume is therefore to take stock to try and capture what the current state of educational policy and practice is across the whole of the UK This has been achieved by commissioning two different papers from each of the four countries Wales Scotland Northern Ireland and England The first is an overview exploring the distinctive history principles and current policies of each country The second paper has been specifically chosen as a case study of a key policy that highlights the distinctiveness of each country the Foundation Phase for Wales assessment policy in Scotland shared education initiatives in Northern Ireland and higher education policy in England Taken together these eight papers give an important insight into the complexities of educational policy and practice across the whole of the UK today This volume was originally published as a special issue of Oxford Review of Education

2012 GCSE English results Great Britain: Parliament: House of Commons: Education Committee, 2013-06-11 The 2012 GCSE English results prompted significant controversy which ultimately resulted in an application for judicial review This report sets out the background to these events and identifies lessons to be learned The problems with GCSE English can be traced back to the 2007/09 development phase of the qualification in particular the turbulence which resulted from the shift away from a mostly linear to a modular system combined with a high proportion of controlled assessment and generous marking tolerances Exam board experts

raised concerns at the time but these were not acted upon by the regulator the then interim Ofqual Further difficulties arose because of pressures from the school accountability system The problems experienced with GCSE English in 2012 highlighted serious weaknesses in the moderation of speaking and listening with consequences for grade awarding The current status of Ofqual as an independent regulator accountable to Parliament is the right one However the Coalition Government is bringing in wholesale changes to GCSEs and A levels to a tight timetable and at the same time Ofqual must have systems in place The Committee is also concerned that there is a rush towards separate exam systems for England Wales and Northern Ireland without careful reflection on what might be lost or consensus that this is the right thing to do

Mathematics and Technology Gilles Aldon, Fernando Hitt, Luciana Bazzini, Uwe Gellert, 2017-04-05 This volume collects most recent work on the role of technology in mathematics education It offers fresh insight and understanding of the many ways in which technological resources can improve the teaching and learning of mathematics The

first section of the volume focuses on the question how a proposed mathematical task in a technological environment can influence the acquisition of knowledge and what elements are important to retain in the design of mathematical tasks in computing environments The use of white smart boards platforms as Moodle tablets and smartphones have transformed the way we communicate both inside and outside the mathematics classroom Therefore the second section discussed how to make efficient use of these resources in the classroom and beyond The third section addresses how technology modifies the way information is transmitted and how mathematical education has to take into account the new ways of learning through connected networks as well as new ways of teaching The last section is on the training of teachers in the digital era The editors of this volume have selected papers from the proceedings of the 65th 66th and 67th CIEAEM conference and invited the correspondent authors to contribute to this volume by discussing one of the four important topics The book continues a series of sourcebooks edited by CIEAEM the Commission Internationale pour l'étude et l'amélioration de l'Enseignement des Mathématiques International Commission for the Study and Improvement of Mathematics Education

Education Policy, Practice and the Professional Jane Bates, Sue Lewis, Andy Pickard, 2019-03-21 In this introduction to educational policy practice and professionalism the authors focus first on providing an historical overview of English policy from the state's first interventions in education through to Thatcherism and the election of the Blair government Chapters then explore the key contemporary policies of recent times and offer a critique on how they have worked in practice with reference to the hysteria that often surrounds education policy An important theme is media representation of educational matters and the effects this has on the teaching profession Commentaries and case studies are presented throughout providing an accessible link to what it was really like to learn teach and live at the time the policy was in place This new edition now includes an account of the measures taken by the Coalition Government of 2010-15 examining the Coalition's continuities with the previous administration whilst also exploring departures from previous thinking and practices updated references and case studies throughout to represent new research and legislation since the first edition an extended discussion of globalization and global policy borrowing further coverage of social justice theory including a perspective on identity theory and the role of education in the development of identity and the marginalisation of individuals and groups a new historical chapter covering the period 1945 to 1997 a summary of the development of the curriculum and a critique of the 2014 National curriculum as pioneered by Michael Gove and a new conclusion setting out the trajectory of current policies and how this may affect educational practitioners This is essential reading for all undergraduate students studying education policy and practice

Teachers Matter - But How? Ninni Wahlström, Daniel Alvunger, Daniel Sundberg, 2019-12-18 Global processes are transforming educational policy around the world in complex ways with different implications for different local arenas Over the last two decades a global neoliberal policy paradigm has emerged placing the teacher at its centre Two well known examples are the OECD report on education and training policy *Teachers Matter* and the McKinsey Company report entitled

How the World's Best Performing School Systems Come Out on Top It now seems more important than ever to highlight some alternatives that might contribute to a broader understanding of the meaning of being a teacher In a time of standardised performance and accountability this special issue raises critical questions about the space for teachers agency and teachers as curriculum agents The different articles from some of our most distinguished researchers in the field provide essential perspectives on the question of where when and how teachers matter Our interest is not primarily to understand the scope of teachers agency but rather to understand what becomes important for teachers in their everyday activities such as teaching students handling educational norms and rules working in a local as well as a global society etc A common theme throughout the articles is that teachers matter in spaces where they can act as moral subjects in their profession in the present drawing on collective and individual experiences of the past whilst imagining a desired future This book was originally published as a special issue of the Journal of Curriculum Studies

Advancing and Consolidating Mathematical Modelling Gilbert Greefrath, Susana Carreira, Gloria Ann Stillman, 2023-04-18 This edited volume presents applications and modelling as a world renowned sub field of research in mathematics education It includes the discussion on students development of modelling competency through the teaching of applications and modelling The teaching of mathematical modelling is considered from different perspectives such as mathematical pedagogical didactical perspectives and critical societal or socio political perspectives Assessment practices local regional or international of modelling activities and difficulties with modelling activities at school and university levels respectively are discussed Use of technology and other resources in modelling activities and their impact on the modelling processes are included in the considerations Teaching practices teacher education and professional development programs concerning the integration of applications and modelling in school and university mathematics programs are developed in this context

Practitioner Research in College-Based Education Shohel, M. Mahruf C., Mortby, Alex, 2024-08-29 Scholars and educators worldwide are grappling with the challenge of translating innovative research findings into tangible improvements within their classrooms The chasm between theory and practice hinders the progress of education and leaves a wealth of untapped potential The need for a process or approach to bridge these elements is urgent Practitioner Research in College Based Education serves as this much needed resource for scholars seeking to overcome this enduring challenge This innovative book offers a roadmap for academic scholars providing insights into practitioner led research across the global landscape of college based education This book is more than a collection of theoretical frameworks it is a solution oriented guide that illuminates the intricacies of research practices methodologies and their real world applications within the context of academic institutions

Fluids Under Control Tomáš Bodnár, Giovanni P. Galdi, Šárka Nečasová, 2023-06-18 This volume presents state of the art developments in theoretical and applied fluid mechanics Chapters are based on lectures given at a workshop in the summer school Fluids under Control held in Prague on August 25 2021 Readers will find a thorough analysis of current research topics presented

by leading experts in their respective fields Specific topics covered include Magnetohydrodynamic systems The steady Navier Stokes Fourier system Boussinesq equations Fluid structure acoustic interactions Fluids under Control will be a valuable resource for students interested in mathematical fluid mechanics Lines of Inquiry in Mathematical Modelling Research in Education Gloria Ann Stillman, Jill P. Brown, 2019-05-16 This open access book is based on selected presentations from Topic Study Group 21 Mathematical Applications and Modelling in the Teaching and Learning of Mathematics at the 13th International Congress on Mathematical Education ICME 13 held in Hamburg Germany on July 24-31 2016 It contributes to the theory research and teaching practice concerning this key topic by taking into account the importance of relations between mathematics and the real world Further the book addresses the balancing act between developing students modelling skills on the one hand and using modelling to help them learn mathematics on the other which arises from the integration of modelling into classrooms The contributions prepared by authors from 9 countries reflect the spectrum of international debates on the topic and the examples presented span schooling from years 1 to 12 teacher education and teaching modelling at the tertiary level In addition the book highlights professional learning and development for in service teachers particularly in systems where the introduction of modelling into curricula means reassessing how mathematics is taught Given its scope the book will appeal to researchers and teacher educators in mathematics education as well as pre service teachers and school and university educators

Politics and Governance of Basic Education Brian Levy, Robert Cameron, Ursula Hoadley, Vinodhan Naidoo, 2018-09-21 This is an open access title available under the terms of a CC BY NC ND 4.0 International licence It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations All over the world economic inclusion has risen to the top of the development discourse A well performing education system is central to achieving inclusive development but the challenge of improving educational outcomes has proven to be unexpectedly difficult Access to education has increased but quality remains low with weaknesses in governance comprising an important part of the explanation The Politics and Governance of Basic Education explores the balance between hierarchical and horizontal institutional arrangements for the public provision of basic education Using the vivid example of South Africa a country that had ambitious goals at the outset of its transition from apartheid to democracy it explores how the interaction of politics and institutions affects educational outcomes By examining lessons learned from how South Africa failed to achieve many of its goals it constructs an innovative alternative strategy for making process combining practical steps to achieve incremental gains to re orient the system towards learning

Mathematical Modelling Education in East and West Frederick Koon Shing Leung, Gloria Ann Stillman, Gabriele Kaiser, Ka Lok Wong, 2021-04-26 This book documents ongoing research and theorizing in the sub field of mathematics education devoted to the teaching and learning of mathematical modelling and applications Mathematical modelling provides a way of conceiving and resolving problems in people's everyday lives as well as sophisticated new problems for society at large Mathematical tradition in

China that emphasizes algorithm and computation has now seen a renaissance in mathematical modelling and applications where China has made significant progress with its economy science and technology In recent decades teaching and learning of mathematical modelling as well as contests in mathematical modelling have been flourishing at different levels of education in China Today teachers and researchers in China become keener to learn from their colleagues from Western countries and other parts of the world in research and teaching of mathematical modelling and applications The book provides a dialogue and communication between colleagues from across the globe with new impetus and resources for mathematical modelling education and its research in both West and East with new ideas on modelling teaching and practices inside and outside classrooms All authors of this book are members of the International Community of Teachers of Mathematical Modelling and Applications ICTMA the peak research body into researching the teaching assessing and learning of mathematical modelling at all levels of education from the early years to tertiary education as well as in the workplace The book is of interest to researchers mathematics educators teacher educators education administrators policy writers curriculum developers professional developers in service teachers and pre service teachers including those interested in mathematical literacy
