Ignasi Navarro I Ferrando, *Current Approaches to Metaphor Analysis in Discourse*, Boston: De Gruyter Mouton, 2019; vii + 381 pp., €26.95 (pbk).

Reviewed by: Shanshan Pei, *Beijing Language & Culture University, China*

Great importance has been attached to exploring metaphors in discourses because they are conducive to discourse coherence and can enact a textual aesthetic simultaneously. In order to interpret its essence in discourses, researchers utilize several effective technological approaches and tools. *Current Approaches to Metaphor Analysis in Discourse* is such a book dedicated to this issue, which aims to promote the latest research on the working mechanism and the classification of metaphors (p.6).

The book introduces a way to improve the efficiency of metaphor analyses in theoretical and practical approaches like mental-space-theory and frame-based approaches, etc.

Structurally, the volume consists of 16 chapters and is divided into three parts. Part I is the introduction. It outlines the contributions of this volume, from which we can get a general understanding of metaphorical knowledge. Kovecses initially interprets a schematic hierarchy of terms in Conceptual Metaphor Theory (CMT) like ‘image schema’ and ‘domain’ to discuss the creation of metaphorical thinking in human mind. Oster’s and Cai and Deignan’s research delivers cross-cultural descriptions of metaphorical words in different languages and inspires the researchers with the cross-culture approach, indicating the connections between genres, cultures and metaphors. Isaeva, Burdina, Apresjan, Blasco, Garcia and Renau take the cognitive-discursive approach to discuss the etymological and metaphorical consistency of professional terms in medical, pharmaceutical and computer discourses, summarizing the latest progress in the study of the examination for conceptual structures of metaphorical terms. Based on these studies, the readers can understand the correlation between semantics of specific phrases and their morphosyntactic properties. Dilai and Serafin shed light on cognitive models underlying metaphors in political discourses. Contemporary Conceptual Metaphor Theory offers strong theoretical support for this analysis. These metaphors mirror the influence of history, culture and society on the metaphorical expressions in the Euromaidan discourse.

Part II is devoted to the consciousness in human mind to structure metaphors in real contexts. ‘Deliberate metaphor’ is the key concept of this part. Cuccio and Steen explain

Visual Metaphors and Aesthetics Michalle Gal, 2022-05-19 This book offers a new definition of metaphor as an ontological and visual construction whose roots are external visual forms and its motivation is our attachment to forms This definition which Michalle Gal names visualist challenges the ruling conceptualist theory of metaphors and places a new emphasis on how we experience rather than understand metaphors In doing so she responds to the visual turn that is taking place in literature and the media demanding that the visual become a site of philosophical analysis This focus on the external visual world allows Gal to employ visual theories to capture the essence of metaphor She looks beyond conceptual or semantic mechanism and returns to theories of Arnheim and Gombrich and the current evolution of ideas about the visual or material and embodied cognition Proposing to see visual metaphors in their basic form she uses a new externalist terminology of ontology visuality composition affordance construction and emergence Setting out a new theory that takes into account that humans are visual no less than cognitive creatures Visual Metaphors and Aesthetics lays the foundation for a new vocabulary to talk about metaphors
