VOLTAGE REGULATOR

The generator charging rate is controlled by a voltage regulator which controls the generator output, thereby maintaining a satisfactory charging rate, and prevents the battery from overcharging under varying temperatures and operating conditions. It should not require adjustment or attention. If the regulator fails to operate correctly, see your International Harvester dealer.

Note: Never place a jumper lead between or accidentally bridge the "BAT" terminal and the "F" terminal on the regulator, as this will damage the regulator.

HEADLIGHTS AND REAR LIGHT

The headlights and rear light on this tractor are sealed-beam lights especially developed for tractor operation. The parts are so constructed that the filament, reflector, and lens are all assembled in a unit permanently sealed against dirt, moisture, and corrosion. Should a filament burn out or a lens break, the complete unit must be replaced. See your International Harvester dealer.
