Montessori Classroom Lesson Plans Robin Norgren M a,2019-09-19 Montessori Lesson Plans Teachers Will Be Proud to Teach these In depth Lesson Plans that Integrate the 9 main areas in the Montessori classroom Why Did I Create These Lesson Plans I connected with the Montessori philosophy and I was excited to get started I was armed with my albums the term used to describe the curriculum covered with the students within a three year learning cycle I had the privilege of experiencing my first primary classroom Unfortunately the former Montessori Teacher also known as the Guide or Directress before left no records tracking the progress of the children I had in my charge I started to panic wondering where I would even begin Can you believe this has happened to me Twice These DAILY lesson plans are the answer to this dilemma and situations similar to this one This is great for directors of schools who want to maintain quality control in the classroom setting and for parents piece of mind Topics We Introduce in October Human Needs Family Love Shelter Food Clothing Community The Universe Our Solar System FAQ Q Are your Montessori Lesson Plans an entire year s curriculum A I am working on creating Montessori education as an entire year s curriculum This educational service has been taught at three different schools I am basically gathering my notes and tweaking what I found worked best and compiling the information into lesson plans The full year makes one complete cycle through what is traditionally called the Primary Albums I have completed my AMS Training and am in the process of finishing my AMI Certification These lesson plans can be taught to ages 3 6 years old The curriculum is more like a spiral in that each year it is used the child continues to learn at his or her own level and pace In the classroom or small group situation the older child will be a model for the younger children and become the expert as they themselves continue to learn on new levels branching out into related areas of interest Q Do I need Montessori Training to Teach these lesson plans A It is ideal to have gone through a Montessori training The lesson plans DO NOT offer the detailed step by step lessons found in the Montessori Albums These lesson plans assist the Montessori teacher to ensure that he she is following a reasonable scope and sequence throughout the year honoring each area of the Montessori classroom in the process Q How do I get started Can I begin the curriculum in the middle of the year A It is ideal to begin with the September guide The Montessori materials are introduced sequentially

beginning in the September guide Q How do you create a 3 hour work time A The ideal is a 2 1 2 to 3 hour work period but this will vary according to age interests attention span etc Early in the year a 3 hour work period is usually not practical as the children have not yet normalized and may become restless after two hours or less As the year progresses they will have received more lessons and developed self discipline and the ability to work on their own and for a longer length of time In fact they are often reluctant to put work away when it is time to stop so give a gentle warning about five minutes before the work period is over This can be done by softly singing Time to put your work away time to your work away time to put your work away and come to the line or whatever is next Just use a simple melody if you aren t familiar with this song Q How can I use the guides without feeling that I need to do almost everything A There is enough material in the guides for about three years so don t try to do everything the first year The curriculum will grow with the child each year it is used Many schools use a two or three year period to complete the curriculum cycle

Basic Montessori David Gettman,1988-05-15 For more than a century Dr Maria Montessori s educational philosophy has been adopted by schools around the world Based on her scientific approach to child learning through observation and experimentation the Montessori Method champions a classroom where children are encouraged to interact with their environment and develop their own natural need for knowledge In Basic Montessori David Gettman has devised a clear and modern explanation of Montessori s revolutionary ideas about early intellectual development offering a step by step guide to the learning behaviors most commonly used with children under five These include activities for introducing reading and writing counting and decimal concepts science and geography as well as activities that help develop the child s practical and sensorial skills A perfect primer for teachers child caregivers and parents this volume shares this essential program to help adults discover how their children learn
