Benedikter, 2011-01-13 For over 2 000 years banks have served to facilitate the exchange of money and to provide a variety  
of economic and financial services During the most recent financial collapse and subsequent recession beginning in 2008  
banks have been vilified as perpetrators of the crisis the public distrust compounded by massive public bailouts Nevertheless  
another form of banking has also emerged with a focus on promoting economic sustainability investing in community  
providing opportunity for the disadvantaged and supporting social environmental and ethical agendas Social Banking and  
Social Finance traces the emergence of the bank with a conscience and proposes a new approach to banking in the wake of  
the economic crisis Featuring innovations and initiatives in banking from Europe Canada and the United States Roland  
Benedikter presents an alternative to traditional banking practices that are focused exclusively on profit maximization He  
argues that social banking is not about changing the system but about improving some of its core features by putting into use  
the triple bottom line principle of profit people planet Important lessons can be learned by the success of social banks that  
may be useful for the greater task of improving the global financial system and avoiding economic crises in the future
