This paper must be answered in English

### GENERAL INSTRUCTIONS

1. There are two sections, A and B, in this Paper.
2. Section A consists of multiple-choice questions in this question paper. Section B contains conventional questions printed separately in the Question-Answer Book.
3. Answers to Section A should be marked on the Multiple-choice Answer Sheet. Answers to Section B should be written in the spaces provided in the Question-Answer Book. **The Answer Sheet for Section A and the Question-Answer Book for Section B must be handed in separately at the end of the examination.**

---

### INSTRUCTIONS FOR SECTION A (MULTIPLE-CHOICE QUESTIONS)

1. Read carefully the instructions on the Answer Sheet. After the announcement of the start of the examination, you should first stick a barcode label and insert the information required in the spaces provided. No extra time will be given for sticking on the barcode label after the 'Time is up' announcement.
2. When told to open this book, you should check that all the questions are there. Look for the words **'END OF SECTION A'** after the last question.
3. All questions carry equal marks.
4. **ANSWER ALL QUESTIONS.** You are advised to use an HB pencil to mark all the answers on the Answer Sheet, so that wrong marks can be completely erased with a clean rubber. You must mark the answers clearly; otherwise you will lose marks if the answers cannot be captured.
5. You should mark only **ONE** answer for each question. If you mark more than one answer, you will receive **NO MARKS** for that question.
6. No marks will be deducted for wrong answers.

*The Introduction of Information and Communication Technology (ICT) in Organizations* J. H. Erik Andriessen, 1996 Information and communication technology (ICT) in organizations has many faces such as office automation, production automation, telecommunication and electronic networks connecting organizations. The C in ICT refers to the fact that besides information processing technologies a rapid growth can be found in computer assisted communication technologies and computer supported co-operative work. Organizations change as a result of socio-economic and technological developments. New organizational forms and work arrangements are emerging and ICT is adapted and designed to solve problems caused by these changes. The impact of the introduction of ICT becomes apparent in changes in work patterns, qualifications and decision making procedures. In this special issue the implementation processes and some of the consequences are discussed mostly on the basis of empirical studies. Contributions include a discussion of recent developments of ICT and organizational change in the banking sector; an analysis of the introduction of technological innovation in the ambulance service in several big cities; and an illustration of the different options in introduction strategies including methods used to facilitate user participation in systems development. In some cases so-called business re-engineering processes form the framework for the analysis.
