Women Philosophers Volume II Dorothy G. Rogers, 2021-04-08
Tackling the intellectual histories of the first twenty women to earn a PhD in philosophy in the United States this book traces their career development and influence on American intellectual life
The case studies include Eliza Ritchie Marietta Kies Julia Gulliver Anna Alice Cutler Eliza Sunderland and many more
Author Dorothy Rogers looks at the factors that led these women to pursue careers in academic philosophy examines the ideas they developed and evaluates the impact they had on the academic and social worlds they inhabited
Many of these women were active in professional academic circles published in academic journals and contributed to important philosophical discussions of the day the question of free will the nature of God in relation to self and how to establish a just society
The most successful women earned their degrees at women friendly institutions yet a handful of them achieved professional distinction at institutions that refused to recognize their achievements at the time
John Hopkins and Harvard are notable examples
The women who did not develop careers in academic philosophy often moved to careers in social welfare or education
Thus whilst looking at the academic success of some this book also examines the policies and practices that made it difficult or impossible for others to succeed
