 are at the same risk for injury as their human counterparts and when they are severely injured best practice for resuscitation  
 mirrors those recommended for humans 1 A recent study of trauma in MWDs shows that explosions gunshot wounds and  
 lacerations account for the vast majorities of injuries sustained within the Central Command area of responsibility In severe  
 cases these mechanisms of injuries could require resuscitation with blood products Hemostatic resuscitation has been shown  
 in a many species to be superior to resuscitation with crystalloids or synthetic colloids and should therefore be considered  
 the first choice resuscitation product in severely wounded MWDs **Pain Management for Veterinary Technicians and
