Kourany,2008-01-20 In *The Challenge of the Social and the Pressure of Practice* philosophers sociologists and historians of science offer a multidisciplinary view of the complex interrelationships of values in science and society in both contemporary and historic contexts They analyze the impact of commercialization and politicization on epistemic aspirations and conversely the ethical dilemmas raised by practically relevant science in today s society For example much scientific research over the past quarter century has been guided by the financing that supports it What effect has this had on the quality of research produced and the advancement of real knowledge The contributors reveal how social values affect objectivity theory and the direction of inquiry and examine the byproducts of external value systems in topics such as expertise and socially robust knowledge among others They view science s own internal value systems the earlier disconnection of societal values from the scientific process and the plausibility of value free science *The Challenge of the Social and the Pressure of Practice* presents an in depth analysis that places the role of values at the center of philosophical debate and raises questions of morality credibility and the future role of values in scientific inquiry      **Index Medicus** ,2001 Vols for 1963 include as pt 2 of the Jan issue Medical subject headings      El-Hi Textbooks & Serials in Print, 2000 ,2000      **Theory and Practice in Sociology**
