Milicianas Lisa Margaret Lines, 2012-01-01 During the first few days of the Spanish Civil War women played an integral role in the spontaneous uprising that prevented the immediate success of the Nationalist coup Around one thousand of these women went on to join the militias who fought at the front Women also played an important role in the defense of cities with another several thousand forming sections of the armed rearguard Indeed women's participation in the anti fascist resistance constituted one of the greatest mass political mobilizations of women in Spain's history Milicianas provides a comprehensive picture of what life was like for the women who fought during the first year of the civil war focusing on how the women themselves viewed this experience It demonstrates that the significance of the miliciana phenomenon lies in the fact that

these women took up arms in relatively large numbers were self motivated participated in combat equally with their male comrades and played an extensive and sophisticated military role By late 1936 attitudes towards women in combat began to change drastically and by March 1937 the majority of milicianas had been removed from their combat positions Though there existed a consensus around this issue among the male leadership of both the Republican government and left wing political groups female combatants viewed this turn of events differently The majority of the milicianas had deep reservations about their recall from the front and saw it as a retreat from the gains women had made during the war and revolution Indeed while the political leadership within the Republic presented numerous arguments for why it was necessary to remove women from combat this book argues that the reason it was initially considered acceptable for women to fight and then seen as undesirable eight months later was connected to the course of the social revolution
