early childhood education it has been demonstrated that a correlation exists between the level of a child's mathematical ability and their future academic success. The reverse of this relationship has also been observed where children who are behind the mathematical skills of their peers continue to fall behind in future studies (Pelkowski et al 2019). Furthermore, it is well established in literature that the more maths learning opportunities a child is exposed to, the more growth they will experience in math knowledge (Piasta et al 2015). Logic 20 x Pattern Recognition Problems 30 x Sudoku Puzzles 30 x 2D Mazes 30 x 3D Mazes. In today's Age of Information, it is of great importance to equip students with critical thinking and logical reasoning skills to effectively decipher and make meaning from large amounts of information (Fitzgerald 2005). Logical reasoning assists in construction of concepts and knowledge in the learning process (Ongcoy 2016). This book includes logic puzzles to promote the cognitive development and logical reasoning to improve their academic performance in high school and beyond (Bouhnik Giat 2009). Shayer and Adey (1993) found that at the completion of a 2-year science program designed to promote formal operational thinking, improvements were seen in maths, English, and science results in the British National Examinations. This book is designed to provide a learning opportunity to foster the curiosity and confidence of children aged 9-14 and set them well on the path to academic success. More Problem Solving Ks2 Paul Martin, 2005-12-01. Real life number and word problems attractively presented supporting the Primary Framework for mathematics. We Can Work it Out! Anita Vickery, Mike Spooner, 2004. This spiral bound photocopiable book contains 25 problem solving activities; each activity is presented so that it can be cut up to make a collection of cards. The cards are written specifically for children operating at levels 3 to 6 of the National Curriculum in mathematics and as such will be appropriate for use in both primary and early secondary phases of education. **We Can Work It Out 2** Anita Vickery, Mike Spooner, 2011. Are you a teacher who needs extra tasks for early finishers? Is your child spending too much time behind a screen? This book was designed to provide a learning opportunity to foster the curiosity and confidence of children aged 8-11 and set them well on the path to academic success. The goal that this book sets out to achieve is to provide puzzles that are stimulating and creative, leaving the puzzle solver hungry for more. To assist in this goal, the use of graphics is used where possible; multi-step puzzles were utilised, and a progression in difficulty exists for every puzzle type. To allow for independent work where necessary, math guides are included, and students can assess their performance themselves via the solutions at the back of the book. What are the learning outcomes for this book? The puzzles inside have been designed to support the learning of key areas outlined in the Primary National Curriculum for Key Stage
