Government announced 110 Public Service Agreement PSA targets for 17 Departments covering the period 2005 08 PSA targets express the priority outcomes that Departments are seeking to achieve nationally and internationally and cover key aspects of the Government s social economic and environmental policy Large sums of public money are devoted to the programmes designed to deliver them This NAO report contains the detailed results of its examination of the data systems

used by six government departments to monitor and report progress against their 2005-08 PSA targets covering a total of 65 data systems. The six Departments are the Cabinet Office, the Department for Culture, Media and Sport, the Department for Education and Skills, the Department for the Environment, Food and Rural Affairs, the Ministry of Defence and HM Treasury. Findings include that 75 per cent of the data systems used are broadly appropriate but less than half of these were fully fit for purpose. Most required some action to strengthen measurement or reporting arrangements. A companion volume HCP 127 I session 2006-07 ISBN 0102944040 is available separately which contains the NAO's summarised findings.

How to Run Your Department Successfully Chris Turner, 2005-04-29. It is increasingly being acknowledged that subject leaders hold the key to school improvement and professional development. However, there is little information available for subject leaders to help them with the day-to-day practicalities of running a department on top of existing teaching commitments. This uniquely practical book deals specifically with current issues faced by subject heads of department (HoDs). Engagingly and entertainingly written, this book covers the major areas of concern to subject leaders, including leadership styles, managing staff, managing pupil performance, strategic planning, curriculum development and coping with problems.

Knowledge, Values and Educational Policy focuses on what schools are for and what should be taught in them, how learning is possible across boundaries and issues of diversity and equity. Policies and practices relating to schools are also considered. Within this volume, internationally renowned contributors address a number of fundamental questions designed to take the reader to the heart of current debates around curriculum, knowledge transfer, equity and social justice and system reform, such as: What are schools and what are they for? What knowledge should schools teach? How are learners different from each other and how are groups of learners different from one another in terms of social class, gender, ethnicity and disability? What influence does educational policy have on improving schools? What influence does research have on our understanding of education and schooling? To encourage reflection, many of the chapters also include questions for debate and a guide to further reading. Read alongside its companion volume, Educational Theories, Cultures and Learning, readers will be encouraged to consider and think about some of the key issues facing education and educationists today.
