It contains over 100 well-respected authors who are leading researchers in their respective fields. Additionally, each of the 95 chapters includes an up-to-date review of available research, resulting in the most comprehensive text on pediatric neuropsychology available in a single volume.

Tests in Print IV contains information on over four thousand instruments. Along with a brief description, entries include population, scoring, pricing, publisher information, and a reference list of professional literature citing articles relevant to individual instruments. Indexes of titles, classified subjects, names, and scores, as well as a publisher's directory and index, are included with notations for out-of-print instruments. Information is given for tests in a wide range of areas including education, psychology, counseling, management, health care, career planning, sociology, child development, social science, and research. Tests in Print IV also provides a comprehensive index to the Mental Measurements Yearbook by directing readers to the appropriate volume for reviews of specific tests.
