Manual De Netflow Analyzer:

Orchestrating and Automating Security for the Internet of Things Anthony Sabella, Rik Irons-Mclean, Marcelo Yannuzzi, 2018-06-04 Master powerful techniques and approaches for securing IoT systems of all kinds current and emerging Internet of Things IoT technology adoption is accelerating but IoT presents complex new security challenges Fortunately IoT standards and standardized architectures are emerging to help technical professionals systematically harden their IoT environments In *Orchestrating and Automating Security for the Internet of Things* three Cisco experts show how to safeguard current and future IoT systems by delivering security through new NFV and SDN architectures and related IoT security standards The authors first review the current state of IoT networks and architectures identifying key security risks associated with nonstandardized early deployments and showing how early adopters have attempted to respond Next they introduce more mature architectures built around NFV and SDN You ll discover why these lend themselves well to IoT and IoT security and master advanced approaches for protecting them Finally the authors preview future approaches to improving IoT security and present real world use case examples This is an indispensable resource for all technical and security professionals business security and risk managers and consultants who are responsible for systems that incorporate or utilize IoT devices or expect to be responsible for them Understand the challenges involved in securing current IoT networks and architectures Master IoT security fundamentals standards and modern best practices Systematically plan for IoT security Leverage Software Defined Networking SDN and Network Function Virtualization NFV to harden IoT networks Deploy the advanced IoT platform and use MANO to manage and orchestrate virtualized network functions Implement platform security services including identity authentication authorization and accounting Detect threats and protect data in IoT environments Secure IoT in the context of remote access and VPNs Safeguard the IoT platform itself Explore use cases ranging from smart cities and advanced energy systems to the connected car Preview evolving concepts that will shape the future of IoT security

Applications of Artificial Intelligence in 5G and Internet of Things Vinod M. Kapse, Lalit Garg, Pavan Kumar Shukla, Varadraj Gurupur, Amit Krishna Dwivedi, 2025-04-30 This is the proceedings of the 1st International Conference on Applications of AI in 5G and IoT ICAAI5GI2024 It brings together ground breaking research and practical insights into integrating Artificial Intelligence within 5G and the Internet of Things IoT This compilation highlights the latest advancements and innovative solutions emerging at the intersection of AI 5G and IoT technologies It also delves into a wide array of topics including the role of AI in enhancing 5G network efficiency the development of intelligent IoT devices and the creation of smart environments powered by these cutting edge technologies It further showcases key findings on AI driven applications in 5G for seamless communication improved connectivity and advanced data processing techniques along with IoT solutions for smart cities industrial automation healthcare and beyond It would be a valuable read for researchers engineers and professionals in AI 5G IoT and related fields It serves as an essential resource for those seeking to stay at the
