Stonehenge (pseud. [i.e. John Henry Walsh.]), 1871 **Autistic Intelligence** Douglas W. Maynard, Jason Turowetz, 2022-05-25 An examination of diagnostic processes that questions how we can better understand autism as a category and the unique forms of intelligence it glosses As autism has grown in prevalence so too have our attempts to make sense of it From placing unfounded blame on vaccines to seeking a genetic cause Americans have struggled to understand what autism is and where it comes from Amidst these efforts however a key aspect of autism has been largely overlooked the diagnostic process itself That process is the central focus of Autistic Intelligence The authors ask us to question the norms by which we measure autistic behavior to probe how that behavior can be considered sensible rather than disordered and to explore how we can better appreciate the individuality of those who receive the diagnosis Drawing on hundreds of hours of

video recordings and ethnographic observations at a clinic where professionals evaluated children for autism the authors analysis of interactions among clinicians parents and children demystifies the categories tools and practices involved in the diagnostic process Autistic Intelligence shows that autism is not a stable category it is the outcome of complex interactional processes involving professionals children families and facets of the social and clinical environments they inhabit The authors suggest that diagnosis in addition to carefully classifying children also can highlight or include unique and particular contributions those with autism potentially can make to the world around us
