### AS 2 "Valuation of Inventories"

#### Question 7

"In determining the cost of inventories, it is appropriate to exclude certain costs and recognize them as expenses in the period in which they are incurred". Provide examples of such costs as per AS 2 "Valuation of Inventories".

#### Answer

As per AS 2 "Valuation of Inventories", certain costs are excluded from the cost of the inventories and are recognised as expenses in the period in which incurred. Examples of such costs are:

- (a) abnormal amount of wasted materials, labour, or other production costs;
- (b) storage costs, unless those costs are necessary in the production process prior to a further production stage;
- (c) administrative overheads that do not contribute to bringing the inventories to their present location and condition; and
- (d) selling and distribution costs.

#### Question 8

The company deals in three products, A, B and C, which are neither similar nor interchangeable. At the time of closing of its account for the year 2014-15, the Historical Cost and Net Realizable Value of the items of closing stock are determined as follows:

Items	Historical Cost (₹ in lakhs)	Net Realisable Value (₹ in lakhs)
A	40	28
B	32	32
C	16	24

What will be the value of closing stock?

#### Answer

As per para 5 of AS 2 on "Valuation of Inventories", inventories should be valued at the lower of cost and net realizable value. Inventories should be written down to net realizable value on an item-by-item basis in the given case.

Franca,Daniel Valero,Victor

Chavarrias,Clàudia Ylla Arbós,Ralph Schielen,Alessandra Crosato,2020-08-27 Rivers form one of the lifelines in our society by providing essential services such as availability of fresh water navigation energy ecosystem services and flood conveyance Because of this essential role mankind has interfered continuously in order to benefit most and at the same time avoid adverse consequences such as flood risk and droughts This has resulted in often highly engineered rivers with a narrow set of functions In the last decades rivers are increasingly considered in a more holistic manner as a system with a multitude of interdependent processes River research and engineering has therefore added to the river fundamentals also themes like ecohydraulics consequences of climate change and urbanisation River Flow 2020 contains the contributions presented at the 10th conference on Fluvial Hydraulics River Flow 2020 organised under the auspices of the Committee on Fluvial Hydraulics of the International Association for Hydro Environment Engineering and Research IAHR What should have been a lively physical gathering of researchers students and practitioners was converted into an online event as the COVID 19 pandemic hindered international travelling and large gatherings of people Nevertheless the fluvial hydraulics community showed their interest and to be very much alive with a high number of participations for such event Since its first edition in 2002 in Louvain la Neuve this series of conferences has found a large and loyal audience in the river research and engineering community while being also attractive to the new researchers and young professionals This is highlighted by the large number of contributions applying for the Coleman award for young researchers and also by the number of applications and attendants to the Master Classes which are aimed at young researchers and students River Flow 2020 aims to provide an updated overview of the ongoing research in this wide range of topics and contains five major themes which are focus of research in the fluvial environment river fundamentals the digital river the healthy river extreme events and rivers under pressure Other highlights of River Flow 2020 include the substantial number of interdisciplinary subthemes and sessions of special interest The contributions will therefore be of interest to academics in hydraulics hydrology and environmental engineering as well as practitioners that would like to be updated about the newest findings and hot themes in river research

and engineering      **Water and Cities in Latin America** Ismael Aguilar-Barajas, Jürgen Mahlknecht, Jonathan Kaledin, Marianne Kjellén, Abel Mejía-Betancourt, 2015-05-08 Approximately 80 per cent of the population of Latin America is concentrated in urban centres Pressure on water resources and water management in cities therefore provide major challenges Despite the importance of the issues there has been little systematic coverage of the topic in book form This work fills a gap in the literature by providing both thematic overviews and case study chapters It reviews key aspects of why water matters in cities and presents case studies on topics such as groundwater management green growth and water services inequalities in water supply the financing of water services and flood management Detailed examples are described from Argentina Brazil Colombia Ecuador Mexico and Peru and there is also a chapter comparing lessons which might be learnt from US cities Contributing authors are drawn from both within and outside the region including from the Inter American Development Bank OECD and World Bank to set the issues in a global context      **Getting to Grips with BIM** James Harty, Tahar Kouider, Graham Paterson, 2015-12-14 With the UK government's 2016 BIM threshold approaching support for small organisations on interpreting filtering and applying BIM protocols and standards is urgently required Many small UK construction industry supply chain firms are uncertain about what Level 2 BIM involves and are unsure about taking first steps towards having BIM capability As digitisation increasingly impacts on work practices Getting to Grips with BIM offers an insight into an industry in change supplemented by practical guidance on managing the transition towards more widespread and integrated use of digital tools to manage the design construction and whole life use of buildings

*Counterterrorism* Benoît Gomis, 2015-07-17 Counterterrorism Reassessing the Policy Response promotes a more nuanced understanding of the effectiveness of current counterterrorism practices and the need for reform It challenges government media and academic accounts that exaggerate terrorist threats particularly in comparison to other threats such as organized crime Author Beno Gomis      [Tailings Management Handbook](#) Kimberly Finke Morrison, 2022-02-01 As long as we have mining and mineral processing tailings and the responsible management thereof will remain at the forefront with a company's environmental social and governance ESG performance in part a reflection of how well tailings risks are being managed The Global Industry Standard on Tailings Management GISTM was published in August 2020 aiming to prevent catastrophic failure of tailings facilities by providing operators with specified measures and approaches throughout the mine life cycle taking into account multiple stakeholder perspectives In 2021 the International Council on Mining Metals ICMM published the Tailings Management Good Practice Guide intended to support safe responsible management of tailings across the global mining industry providing guidance on good governance and engineering practices to support continual improvement in tailings storage facility TSF management and help foster and strengthen the safety culture of mining companies The Tailings Management Handbook is important and timely because there is no other comprehensive resource rooted in these new fundamentals and global principles for tailings management Tailings management requires interdisciplinary and cross

functional understanding and support which is apparent throughout this handbook Dive into the wealth of information contributed by more than 100 world renowned experts beautifully crafted into a full color handbook that focuses on the basics life cycle planning site and tailings characterization TSF design and construction as well as systems and operations of TSFs The inclusion of 42 case studies is an added plus with real world successes and lessons learned

*A Practical Guide to Industrial Ecology by Input-Output Analysis* Shinichiro Nakamura,2023-11-01 This book addresses the growing need for a standard textbook on input output analysis IO within the context of industrial ecology IE IE is a discipline dedicated to providing system wide quantitative and science based solutions for sustainable development challenges and its global importance has been rapidly increasing The primary analytical tools of IE are life cycle assessment LCA and material flow analysis MFA IO has been widely utilized for LCA since the late 1990s and is increasingly being applied to MFA as well This trend is being driven by the greater availability and application of global IO data which now includes an ever expanding number of countries and regions Despite the presence of excellent textbooks on IO and IE individually there is a lack of resources that integrate these two fields This book seeks to fill that gap by focusing on the practical application of IO to IE specifically in the context of LCA and MFA By combining these methodologies readers can gain valuable insights into sustainable development issues and contribute to more effective solutions in the field of IE

**Text-Based Research and Teaching** Peter Mickan,Elise Lopez,2016-12-26 Contributions in this book illustrate the many methods available for researching language in context and for the analysis of everyday text types Each chapter highlights language as a resource for the expression of meanings a social semiotic resource Text analysis is used to reveal our capacity to formulate multiple meanings for participation in different social practices in relationships in work in education and in leisure The approach is

applied in text based teaching and in the critical analysis of public discourses The texts come from different social spheres including banking language classes senate hearings national tests and textbooks and interior architecture Text based research makes a major contribution to Critical Discourse Analysis The editors and authors of this book demonstrate the value of text analysis for awareness of the role of language for accountable citizenship and for teaching and learning This book will be of interest to anyone researching in the fields of language learning and teaching functional linguistics multimodality social semiotics systemic functional linguistics text based teaching and genre analysis as well as literacy teachers and undergraduate and postgraduate students of linguistics media and education Utopia in the Anthropocene

Michael Harvey,2019-06-03 Utopia in the Anthropocene takes a cross disciplinary approach to analyse our current world problems identify the key resistance to change and take the reader step by step towards a more sustainable equitable and rewarding world It presents paradigm shifting models of economics political decision making business organization and leadership and community life These are supported by psychological evidence utopian literature and inspirational changes in history The Anthropocene is in crisis because human activity is changing almost everything about life on this planet at an unparalleled pace Climate change the environmental emergency economic inequality threats to democracy and peace and an onslaught of new technology these planetwide risks can seem too big to comprehend let alone manage Our reckless pursuit of infinite economic growth on a finite planet could even take us towards a global dystopia As an unprecedented frenzy of change grips the world the case for utopia is stronger than ever An effective change plan requires a bold imaginative vision practical goals and clarity around the psychological values necessary to bring about a transformation This book will be of great interest to students and scholars of the environmental humanities sustainability studies ecological economics organizational psychology politics utopian philosophy and literature and all who long for a better world A Practical Guide

for Genetic Management of Fragmented Animal and Plant Populations Richard Frankham,Jonathan D. Ballou,Katherine Ralls,Mark Eldridge,Michele R. Dudash,Charles B. Fenster,Robert C. Lacy,Paul Sunnucks,2019-10-23 The habitats of most species have been fragmented by human actions isolating small populations that consequently develop genetic problems Millions of small isolated fragmented populations are likely suffering from inbreeding depression and loss of genetic diversity greatly increasing their risk of extinction Crossing between populations is required to reverse these effects but managers rarely do so A key reason for such inaction is that managers are often advised to manage populations in isolation whenever molecular genetic methods indicate genetic differences among them Following this advice will often doom small populations to extinction when the habitat fragmentation and genetic differences were caused by human activities A paradigm shift is required whereby evidence of genetic differentiation among populations is a trigger to ask whether any populations are suffering genetic problems and if so whether they can be rescued by augmenting gene flow Consequently there is now an urgent need for an authoritative practical guide to facilitate this paradigm shift in genetic management of fragmented

Increasingly it is being recognized that spirituality defined here as a multiform search for a transcendent meaning of life that connects them to all living beings and brings them in touch with God or Ultimate Reality is an aspect of almost every sphere and aspect of social life. It appears in humanity's dealings with nature, home and community, healing, economics and business, knowledge and education. The Routledge International Handbook of Spirituality in Society and the Professions is a stimulating collection that summarizes the most important issues, frameworks, discussions and problems relating to spiritually inspired activities in different fields of social life. The contributors explore how spirituality is a part of existence and present approaches and models for professionals working in diverse areas. Presented in seven parts, the book provides a full overview of current research and practice. Part II Facets of spirituality explores topics including philosophy, psychology, theology and culture. Part III Nature looks at ecology, agriculture, cities and tourism. Part IV Home and community presents chapters on various life stages, disability, gender and culture. Part V Healing examines medicine, mental and physical health and ill health. In Part VI Economy, politics and law, contributors discuss business leadership and the workplace, peace and policing. Part VII Knowledge and education includes chapters on science, design, fashion, literature and the arts. In the final part, Way forward, the editors look to the future with a chapter on inter-spirituality and the renewal of social practices. Driven by contemporary research and new developments, this Handbook is an innovative and interdisciplinary collection that provides an essential overview of contemporary spirituality and society from an international selection of contributors. The Routledge International Handbook of Spirituality in Society and the Professions offers accessible, diverse and engaging international research and its scope will appeal to academics and students of a wide range of subjects including aging and addiction, psychology, theology, religious studies, sociology, business studies and philosophy. It will also be an important work for professionals in medical and social services, the clergy, education, business, the arts, religious communities and politics and members of organizations looking at the links between spirituality, religion and society.
