Starting Science...Again? Martin

Braund, 2008-10-09 The structure of this book encourages active participation via reflective activity boxes which further allows for the engagement and consolidation of ideas Evidence based research is cited resulting in the author suggesting a number of practical activities to encourage progression and continuity in science ESCalate Why do pupils learning and motivation slow down markedly as they move from primary to secondary school Why is this situation worse in science than in any other curriculum subject This book combines reports of and reflection on best practice in improving progression and continuity of teaching and learning in science particularly at that transition stage between primary and secondary school Presenting the views of teachers and pupils on progression learning and application of science the book suggests practical ways of improving teaching and learning in science Each chapter includes examples of learning materials with notes on how these might be used or adapted by teachers in their own classroom settings Science teaching in secondary schools is often based on assumptions that children know or can do very little so the job in the secondary school becomes one of showing pupils how to start doing science properly as if from scratch The damage that this false view can do to pupils learning

motivation and confidence is clear This book will help teachers to assess children s prior knowledge effectively and build meaningful and enjoyable science lessons **Ks1 Magical Sats English Workbook** Alison Head,2007-12 Based on appealing magical characters this new Workbook complements the KS1 English Revision Guide to fully prepare pupils for their SATs It is specifically aimed at pupils working towards Level 2 **Bringing the English Curriculum to Life** David Didau,2024-04-12 Bringing the English Curriculum to Life builds on David Didau s groundbreaking book Making Meaning in English by showing how the principles of the original book can be applied in schools and classrooms Drawing together experiences of designing teaching supporting and assessing English across the schools within Ormiston Academies Trust OAT this book demonstrates what an ambitious coherently sequenced broad and balanced English curriculum with successful adaption for students with SEND can look like in practice Designed around the explicit teaching of the powerful conceptual knowledge students need to master the discipline the book offers a fully resourced English curriculum packed with teaching suggestions and examples of high quality practice Covering intent implementation and assessment and outlining in detail what is included in each module for KS3 and 4 the curriculum can be adopted in its entirety but is also flexible enough for departments to take modules and slot them into their own curriculum Providing an inspiring model for teaching English that enables all students to succeed this is an essential resource for all English teachers and school leaders responsible for curriculum development *Policy, Belief and Practice in the Secondary English Classroom* Bethan Marshall,Simon Gibbons,Louise Hayward,Ernest Spencer,2018-11-01 Studies of comparative classroom practice in the teaching of secondary English are limited especially when it comes to exploration of the day to day practice of English teachers in the secondary classroom This book presents a case study analysis of secondary classroom practice in three countries Canada England and Scotland Each country has had different degrees of state involvement within the secondary English curriculum over the last twenty years England has had the highest degree of state involvement in that it has had several statutory national curricula and a variety of assessment regimes Scotland has had a non statutory curriculum and no national tests and Canada has had no national curriculum at all with education being determined at province level and each province varying its policies The research adopts a case study approach involving both classroom observation and interviews with teachers Through this the authors explore the impact of state involvement on the reality of what happens in secondary English classrooms The book invites readers to consider the applicability of the findings to their own contexts to examine their own practice in the light of this and to consider the nature of the relationships between policy personal belief and practice in the teaching of English
