

## ETAP Validation Cases and Comparison Results

ETAP is Verified and Validated (V&V) against field results, real system measurements, published cases, other programs, and third calculations in order to assess its technical accuracy. Prior to installation, to accompany the V&V of our software and capabilities, the ETAP Test Group will use test cases to the existing history of experience. In addition, the Test Group reviews all existing test cases, as part of our extensive and comprehensive V&V process.

In accordance with IEEE Quality Assurance Program, all procedures and activities related to the quality of ETAP software are subject to internal and external audits, including customer checks and ISO 9001 third certification assessments. Test cases are reviewed during the audit process.

**Power System Dynamics with Computer-Based Modeling and Analysis** Yoshihide Hase, Tanuj Khandelwal, Kazuyuki Kameda, 2020-01-21 A unique combination of theoretical knowledge and practical analysis experience Derived from Yoshihide Hases Handbook of Power Systems Engineering 2nd Edition this book provides readers with everything they need to know about power system dynamics Presented in three parts it covers power system theories computation theories and how prevailed engineering platforms can be utilized for various engineering works It features many illustrations based on ETAP to help explain the knowledge within as much as possible Recompiling all the chapters from the previous book Power System Dynamics with Computer Based Modeling and Analysis offers nineteen new and improved content with updated information and all new topics including two new chapters on circuit analysis which help engineers with non electrical engineering backgrounds Topics covered include Essentials of Electromagnetism Complex Number Notation Symbolic Method and Laplace transform Fault Analysis Based on Symmetrical Components Synchronous Generators Induction motor Transformer Breaker Arrester Overhead line Power cable Steady State Transient Dynamic Stability Control governor AVR Directional Distance Relay and R X Diagram Lightning and Switching Surge Phenomena Insulation Coordination Harmonics Power Electronics Applications Devices PE circuit and Control and more Combines computer modeling of power systems including analysis techniques from an engineering consultants perspective Uses practical analytical software to help teach how to obtain the relevant data formulate what if cases and convert data analysis into meaningful information Includes mathematical details of power system analysis and power system dynamics Power System Dynamics with Computer Based Modeling and Analysis will appeal to all power system engineers as well as engineering and electrical engineering students User's Guide for an Interactive Personal Computer Interface for the 1998 Aeroprediction Code (AP98) Thomas C. Hymer, Frankie Gale Moore, Cornell Downs, 1998 This report describes interactive user friendly pre processing and post processing personal computer P C modules designed to operate with the latest version of the Naval Surface Warfare Center NSWC Aeroprediction Code AP98 As part of the preprocessing input module geometry inputs are automated by giving the user many options By using this new software a set of aerodynamic coefficients can be obtained on most weapon configurations in less than 15 minutes from time of initial setup to computer outputs compared to 2 4 hours for the AP98 computer mainframe version While the computer cost savings are modest the AP98 executes on a large computer in less than a second the manpower savings and productivity enhancements can be significant Various plots of the aerodynamic coefficients are available to the user and are plotted automatically by the post processing module Data output is also made available to the user in the form of standard Aeroprediction output files as well as tabulated data The User s Guide is designed to aid users of the AP98 by correlating AP98 P C Interface Data Inputs and the corresponding source code variable names **The Mekong** Ian Charles Campbell, 2009-11-20 The Mekong is the most controversial river in Southeast Asia and increasingly the focus of

international attention It flows through 6 countries China Myanmar Laos Thailand Cambodia and Viet Nam The 4 downstream countries have formed the Mekong River Commission to promote sustainable development of the river and many of their people depend on it for their subsistence it has possible the largest freshwater fishery in the world and the Mekong waters support rice agriculture in the delta in Viet Nam which produces about 40% of that country s food as well as in Cambodia Laos and Thailand China is now building the first large mainstream dam on the river and has proposals for several more These dams are likely to affect the downstream countries Several of the downstream countries also have plans for large scale hydropower and irrigation development which could also impact the river This book will provide a solid overview of the biophysical environment of the Mekong together with a discussion of the possible impacts biophysical economic and social of some possible development scenarios It is intended to provide a technical basis which can inform the growing political and conservation debate about the future of the Mekong River and those who depend on it It is aimed at river ecologists geographers environmentalists and development specialists both in the basin and especially outside for whom access to this material is most difficult This book will be the first comprehensive treatment of the Mekong system The first comprehensive overview of all aspects of the Mekong River system Deals with a regionally critical ecosystem and one under threat The Mekong supports the world s largest freshwater fishery and provides water underpinning a major regional rice paddy system Presents the authoritative findings of the Mekong River Commission s research for a wider audience for the first time outside of limited distribution reports

Institutions, Livelihoods and the Environment Per Ronnås, Andrea Straub, 2001 Despite the recent economic crisis mainland Southeast Asia continues to experience increasing economic integration of previously isolated rural hinterlands especially in the upland areas of Lao PDR Thailand Vietnam Cambodia and Yunnan in China where demographic pressures together with the development of infrastructure and increased market orientation of production combine to bring about significant economic and social change in rural areas These changes have also led to significant environmental degradation such as deforestation disturbance of water flows and depletion of biodiversity resources These and other related issues are addressed in this volume

Thermal Power Plants Mohammad Rasul, 2012-01-13 Thermal power plants are one of the most important process industries for engineering professionals Over the past few decades the power sector has been facing a number of critical issues However the most fundamental challenge is meeting the growing power demand in sustainable and efficient ways Practicing power plant engineers not only look after operation and maintenance of the plant but also look after a range of activities including research and development starting from power generation to environmental assessment of power plants The book Thermal Power Plants covers features operational issues advantages and limitations of power plants as well as benefits of renewable power generation It also introduces thermal performance analysis fuel combustion issues performance monitoring and modelling plants health monitoring including component fault diagnosis and prognosis functional analysis economics of plant operation and maintenance and

environmental aspects This book addresses several issues related to both coal fired and gas turbine power plants The book is suitable for both undergraduate and research for higher degree students and of course for practicing power plant engineers
