How To Dig A Trench Fast:

On the Wing of Speed Donald T Phillips, 2006-05-01 The early days of 1781 cast a cold shadow over the downtrodden American Continental army. Mutiny, the recent disastrous losses in South Carolina at Camden and Charleston, and Benedict Arnold's betrayal called General George Washington's leadership into question. Faced with the possibility of either a crushing defeat or a brilliant victory, Washington's loyalty to the fledgling United States compelled him to make a bold offensive stroke in the late summer of 1781. In less than a month, he marched the combined American and French armies to Yorktown, Virginia, nearly 450 miles south of their encampment at New York, to face the might of the British army. Through a riveting mixture of fact and dialogue, noted author Donald T. Phillips chronicles the remarkable events of the Siege of Yorktown. From dramatic artillery assaults to the celebrated American and French attacks, and finally to the incredible British surrender, *On the Wing of Speed* delivers a thrilling tale of courage, strength, and devotion. Extraordinary. Brilliant. Don Phillips does more than take the reader to the scene; he renders us participants in the experience. *On the Wing of Speed* is a compelling read for all Americans who want to understand how the United States was born. Admiral James M. Loy, Deputy Secretary, Homeland Security, Ret.; Commandant of the U.S. Coast Guard, Ret. *Ultra-Fast Silicon Bipolar Technology* Ludwig Treitinger, Mitiko Miura-Mattausch, 2013-03-13 Since the first bipolar transistor was investigated in 1947, enormous efforts have been devoted to semiconductor devices. The strong world-wide competition in fabricating metal oxide semiconductor field-effect transistors (MOSFETs), memories, and other semiconductor technology, bipolar transistors play a major role due to their high-speed performance. Delay times of about 20 ps per gate have already been achieved. Because of this rapid technological progress, it is difficult to predict the future with any certainty. In 1987, a special session on ultrafast bipolar transistors was held at the European Solid State Device Research Conference. Its aim was to summarize the most recent developments and to discuss the future of bipolar transistors. This book is based on that session but also includes contributions by other participants such that a broad range of up-to-date information is presented. Several conclusions can be drawn from this information: the first and most important is the very large potential for future progress still existing in this field. This progress is characterized by the drive towards higher speed and lower power consumption required for complex single-chip systems, as well as by several concrete technological implementations for fulfilling these demands. A large part of this potential can be realized by rather unsophisticated techniques and configurations well suited to uncomplicated transfer to fabrication. **Venezuelan Stick Fighting** Michael J. Ryan, 2016-10-05 In *Venezuelan Stick Fighting: The Civilizing Process in Martial Arts*, Michael J. Ryan examines the modern and historical role of the secretive tradition of stick fighting within rural Venezuela. Despite profound political and economic changes from the early twentieth century to the modern day, traditional values, practices, and social imaginaries associated with older forms of masculinity and sociality are still valued. Stick, knife, and machete fighting are understood as key means of instilling the values of fortitude and

cunning in younger generations Recommended for scholars of anthropology social science gender studies and Latin American studies **An Introduction to the Languages of the World** Anatole Lyovin,Brett Kessler,William Ronald Leben,2017 The only textbook of its kind An Introduction to the Languages of the World is designed to introduce beginning linguistics students who now typically start their study with little background in languages to the variety of the languages of the world Construction Methods ,1925 *The Excavating Engineer* ,1925 Engineering News-record ,1912
