Storage quickly became required reading for all those interested in or engaged by the need to implement regulatory approaches to CCS. The intervening years have seen significant developments globally. Earlier legislative models are now in force providing important lessons for future legal design. Despite these developments, the growth of the technology has been slower in some jurisdictions than others. This timely new edition will update and critically assess these updates and provide context for the development of CCS in 2018 and beyond.

Nudge and the Law Alberto Alemanno, Anne-Lise Sibony, 2015-09-24 Behavioural sciences help refine our understanding of human decision making. Their insights are immensely relevant for policy making since public intervention works much better when it targets real people rather than imaginary beings assumed to be perfectly rational. Increasingly governments around the world are keen to rely on those insights for reshaping public interventions in a wide range of policy areas such as energy, health, financial services and data protection. When policy making meets behavioural sciences, effective and low cost regulations can emerge in the form of default rules, smart disclosure and simplification requirements. While behaviourally informed intervention has a huge potential for policymaking, it also attracts legitimacy and practicability concerns. *Nudge and the Law* takes a European perspective on those issues and explores the legal implications of the emergent phenomenon of behavioural regulation by focusing on the challenges and opportunities it may offer to EU policy making and beyond.

This Changes Everything Naomi Klein, 2014-09-16 The most important book yet from the author of the international bestseller *The Shock Doctrine*, a brilliant explanation of why the climate crisis challenges us to abandon the core free market ideology of our time, restructure the global economy and remake our political systems. In short, either we embrace radical change ourselves or radical changes will be visited upon our physical world. The status quo is no longer an option. In *This Changes Everything*, Naomi Klein argues that climate change isn't just another issue to be neatly filed between taxes and health care. It's an alarm that calls us to fix an economic system that is already failing us in many ways. Klein meticulously builds the case for how massively reducing our greenhouse emissions is our best chance to simultaneously reduce gaping inequalities, re-imagine our broken democracies and rebuild our gutted local economies. She exposes the ideological desperation of the climate change deniers, the messianic delusions of the would-be geoengineers and the tragic defeatism of too many mainstream green initiatives. And she demonstrates precisely why the market has not and cannot fix the climate crisis but will instead make things worse with ever more extreme and ecologically damaging extraction methods accompanied by rampant disaster capitalism. Klein argues that the changes to our relationship with nature and one another that are required to respond to the climate crisis humanely should not be viewed as grim penance but rather as a kind of gift, a catalyst to transform broken economic and cultural priorities and to heal long-festered historical wounds. And she documents the inspiring movements that have already begun this process: communities that are not just refusing to be sites of further fossil fuel extraction but are building the next regeneration-based economies right now. Can we pull off these changes in time? Nothing is certain. Nothing except that

climate change changes everything And for a very brief time the nature of that change is still up to us

A History of Scientific Journals Aileen Fyfe, Noah Moxham, Julie McDougall-Waters, Camilla Mørk Røstvik, 2022-10-03 Modern scientific research has changed so much since Isaac Newton's day it is more professional collaborative and international with more complicated equipment and a more diverse community of researchers Yet the use of scientific journals to report share and store results is a thread that runs through the history of science from Newton's day to ours Scientific journals are now central to academic research and careers Their editorial and peer review processes act as a check on new claims and findings and researchers build their careers on the list of journal articles they have published The journal that reported Newton's optical experiments still exists First published in 1665 and now fully digital the Philosophical Transactions has carried papers by Charles Darwin Dorothy Hodgkin and Stephen Hawking It is now one of eleven journals published by the Royal Society of London Unrivalled insights from the Royal Society's comprehensive archives have enabled the authors to investigate more than 350 years of scientific journal publishing The editorial management business practices and financial difficulties of the Philosophical Transactions and its sibling Proceedings reveal the meaning and purpose of journals in a changing scientific community At a time when we are surrounded by calls to reform the academic publishing system it has never been more urgent that we understand its history

Empirical Legal Research Frans L. Leeuw, Hans Schmeets, 2016-03-25 Empirical Legal Research describes how to investigate the roles of legislation regulation legal policies and other legal arrangements at play in society It is invaluable as a guide to legal scholars practitioners and students on how to do empirical legal research covering history methods evidence growth of knowledge and links with normativity This multidisciplinary approach combines insights and approaches from different social sciences evaluation studies Big Data analytics and empirically informed ethics The authors present an overview of the roots of this blossoming interdisciplinary domain going back to legal realism the fields of law economics and the social sciences and also to civilology and evaluation studies The book addresses not only data analysis and statistics but also how to formulate adequate research problems to use and test different types of theories explanatory and intervention theories and to apply new forms of literature research to the field of law such as the systematic rapid and realist reviews and synthesis studies The choice and architecture of research designs the collection of data including Big Data and how to analyze and visualize data are also covered The book discusses the tensions between the normative character of law and legal issues and the descriptive and causal character of empirical legal research and suggests ways to help handle this seeming disconnect This comprehensive guide is vital reading for law practitioners as well as for students and researchers dealing with regulation legislation and other legal arrangements

Investing in Science Massimo Florio, 2019-10-15 A proposal for using cost benefit analysis to evaluate the socioeconomic impact of public investment in large scientific projects Large particle accelerators outer space probes genomics platforms all are scientific enterprises managed through the new form of the research infrastructure in which communities of scientists collaborate across nations universities research institutions and disciplines Such large projects are often publicly funded with no accepted way to measure the benefits to society of these investments In this book Massimo Florio suggests the use of cost benefit analysis CBA to evaluate the socioeconomic impact of public investment in large and costly scientific projects The core concept of CBA of any infrastructure is to undertake the consistent intertemporal accounting of social welfare effects using the available information Florio develops a simple framework for such accounting in the research infrastructure

context and then offers a systematic analysis of the benefits in terms of the social agents involved He measures the benefits to scientists students and postdoctoral researchers the effect on firms of knowledge spillovers the benefits to users of information technology and science based innovation the welfare effects on the general public of cultural services provided by RIs and the willingness of taxpayers to fund scientific knowledge creation Finally Florio shows how these costs and benefits can be expressed in the form of stochastic net present value and other summary indicators
