Midas Gen Manual 2015:

Performance-Based Seismic Design of Concrete Structures and Infrastructures Plevris, Vagelis, Kremmyda, Georgia, Fahjan, Yasin, 2017-02-14 Solid design and craftsmanship are a necessity for structures and infrastructures that must stand up to natural disasters on a regular basis Continuous research developments in the engineering field are imperative for sustaining buildings against the threat of earthquakes and other natural disasters Performance Based Seismic Design of Concrete Structures and Infrastructures is an informative reference source on all the latest trends and emerging data associated with structural design Highlighting key topics such as seismic assessments shear wall structures and infrastructure resilience this is an ideal resource for all academicians students professionals and researchers that are seeking new knowledge on the best methods and techniques for designing solid structural designs *Green Building, Materials and Civil Engineering* Jimmy C.M. Kao, Wen-Pei Sung, Ran Chen, 2014-10-21 This book contains select green building materials and civil engineering papers from the 4th International Conference on Green Building Materials and Civil Engineering GBMCE which was held in Hong Kong August 21 22 2014 This volume of proceedings aims to provide a platform for researchers engineers academics and industry professionals f **Structural Analysis of Historical Constructions** Rafael Aguilar, Daniel Torrealva, Susana Moreira, Miguel A. Pando, Luis F. Ramos, 2018-08-18 This volume contains the proceedings of the 11th International Conference on Structural Analysis of Historical Constructions SAHC that was held in Cusco Peru in 2018 It disseminates recent advances in the areas related to the structural analysis of historical and archaeological constructions The challenges faced in this field show that accuracy and robustness of results rely heavily on an interdisciplinary approach where different areas of expertise from managers practitioners and scientists work together Bearing this in mind SAHC 2018 stimulated discussion on the new knowledge developed in the different disciplines involved in analysis conservation retrofit and management of existing constructions This book is organized according to the following topics assessment and intervention of archaeological heritage history of construction and building technology advances in inspection and NDT innovations in field and laboratory testing applied to historical construction and heritage new technologies and techniques risk and vulnerability assessments of heritage for multiple types of hazards repair strengthening and retrofit of historical structures numerical modeling and structural analysis structural health monitoring durability and sustainability management and conservation strategies for heritage structures and interdisciplinary projects and case studies This volume holds particular interest for all the community interested in the challenging task of preserving existing constructions enable great opportunities and also uncover new challenges in the field of structural analysis of historical and archeological constructions *Spectroscopic Instrumentation* Thomas Eversberg, Klaus Vollmann, 2014-11-10 In order to analyze the light of cosmic objects particularly at extremely great distances spectroscopy is the workhorse of astronomy In the era of very large telescopes long term investigations are mainly performed with small professional instruments Today

they can be done using self designed spectrographs and highly efficient CCD cameras without the need for large financial investments This book explains the basic principles of spectroscopy including the fundamental optical constraints and all mathematical aspects needed to understand the working principles in detail It covers the complete theoretical and practical design of standard and Echelle spectrographs Readers are guided through all necessary calculations enabling them to engage in spectrograph design The book also examines data acquisition with CCD cameras and fiber optics as well as the constraints of specific data reduction and possible sources of error In closing it briefly highlights some main aspects of the research on massive stars and spectropolarimetry as an extension of spectroscopy The book offers a comprehensive introduction to spectroscopy for students of physics and astronomy as well as a valuable resource for amateur astronomers interested in learning the principles of spectroscopy and spectrograph design

Proceedings of the International Conference on Building Materials (ICBM 2024) 31 October - 03 November, Hanoi, Vietnam Rafat Siddique, Marios Soutsos, Juan Li, Trong-Phuoc Huynh, Tuan Ngo, 2025-04-29 This volume presents articles from the International Conference on Building Materials ICBM2024 with the theme Building Materials in the 21st Century held at Hanoi in Vietnam from 31st October to 03rd November The conference is a diversified topic forum for international and Vietnamese researchers academics industry professionals experts and policy makers etc to share their views and to learn from others about recent and current developments in science and technology of building materials in the 21st century and also to discuss actions required for forthcoming building materials as well as construction development in the future The book highlights recent research on cement concrete refractory materials fire resistant materials paints glass product quality testing methods environmental protection and recycling wastes in building material industry

Population Genomics: Microorganisms Martin F. Polz, Om P. Rajora, 2019-01-07 Population genomics is a rapidly emerging field that has the potential to transform our understanding of how evolutionary forces shape genomic diversity

among microbes There have already been considerable advances in understanding gene flow and spread of adaptive traits and in linking epidemiology with evolutionary biology The current challenge is to find unifying evolutionary principles for organisms that display a wide range of reproductive biology from highly clonal to promiscuous and for which the vast majority have eluded cultivation This requires interdisciplinary approaches that incorporate novel computational tools testing of existing and novel population genetic models and creative new ways of linking genetic diversity to ecological factors This pioneering book will discuss the advances made and promises of population genomics in microorganisms outlining some of the key theoretical and practical challenges for microbial population genomics including defining and identifying populations genomics based reverse ecology and building appropriate tools to understand microbes in a variety of complex environments
