and the King s Road Chelsea all appear in these pages but it is argued that the swinging moment of the mid sixties was a passing symptom of a much broader transformation from an industrial to a service based city and it is that transformation which this book examines London is too complex and diverse a city to be comprehended in a simple linear narrative this book adopts instead an innovative approach to urban history by which London life and London s transformation are examined through a number of case studies looking at specific themes and areas of the city Consumerism and the experience economy home ownership and gentrification deindustrialisation and deprivation racial tension and unemployment the attrition of public services and the steady loss of confidence in public agencies national and local emerge as overarching themes from the individual case studies in this book Their combined effect it is argued was to prepare the ground for the Britain that Margaret Thatcher is usually held to have created after 1979 without Thatcher herself having anything to do it *Second Nature Urban Agriculture* André Viljoen,Katrin Bohn,2014-07-25 Winner of the 2015 RIBA President s Award for Outstanding University Located Research This book is the long awaited sequel to Continuous Productive Urban Landscapes Designing Urban Agriculture for Sustainable Cities Second Nature Urban Agriculture updates and extends the authors concept for introducing productive urban landscapes including urban agriculture into cities as essential elements of sustainable urban infrastructure It reviews recent research and projects on the subject and presents concrete actions aimed at making urban agriculture happen As pioneering thinkers in this area the authors bring a unique overview to contemporary developments and have the experience to judge opportunities and challenges facing those who wish to create more equitable resilient desirable and beautiful cities *Public Health Nutrition* Judith L.
