Mythbusters Curriculum Guide:

Collecting for the Curriculum Amy J. Catalano, 2015-09-28 If you are a librarian charged with collecting curriculum materials and children's literature to support the Common Core State Standards then this book is the only one that offers explicit advice on collection development in curriculum collections for you. While there are many publications on the Common Core for school librarians and K-12 educators, no such literature exists for curriculum librarians at the post-secondary level. This book fills that gap, standing alone as a guide to collection development for curriculum librarians independent of the Common Core State Standards (CCSS). The book provides instruction and guidance to curriculum librarians who acquire and manage collections so you can develop a collection based on best practices. The book begins with a primer on the CCSS and how curriculum librarians can support them. Discussion of the Standards is then woven through chapters arranged by content area that share research-based practices in curriculum development and instruction to guide you in curriculum selection. Material types covered include games, textbooks, children's literature, primary sources, counseling, and nonfiction. Additional chapters cover the management of curriculum collections, testing collections, and instruction and reference, as well as how to support and collect for special needs learners. Current practices in collection development for curriculum materials librarians are also reviewed. The book closes with a discussion of the future of curriculum materials.

Current Index to Journals in Education ,2001 **Gender Equity in Education** Beverly A. Stitt,1994 Recent studies show that either consciously or unconsciously teachers are not practicing gender equity in the classroom Boys are called on more in class than girls and are encouraged to pursue careers from which girls are

excluded because they are thought to be less capable. Serious questions arise for educators and counselors in this time of increasing awareness of the implications of gender bias such as what comprises a gender fair education and how can gender equity become part of the classroom curriculum. Guidance counselors and teachers share an important responsibility in seeking answers to these questions in order to avoid limiting students' potential because of gender. To achieve this end, Beverly A. Stitt has compiled an annotated bibliography of hundreds of books, articles, videos, classroom activities, and curriculum and workshop guides to help provide the tools needed for educators to become more gender conscious and to develop a gender fair educational system. The bibliography is divided into twenty-three categories under the headings of Agriculture and Industry, Business Career Guidance, Communications, Computers, Discrimination, Displaced Homemakers, Reentry Women, Elementary Education, Family and Work Issues, Gender Role Stereotyping, History, Home Economics, In-service Training, Legislation, Male Focus, Math and Science, Nontraditional Careers, Pregnant and Parenting Teens, Recruitment, Special Needs Teaching, Vocational Education, and Women's Studies. Each entry's annotation provides a short description of the content, the age group to which the resource applies, and ordering information. The book concludes with an index in which entries are cross-referenced under various categories to further aid the reader's research.
