Dictionary of American History: Contributors, learning guide, and index Stanley I. Kutler, 2003

Training School Principals as Talent Developers Sonya Hayes, Nahed Abdelrahman, Beverly Irby, Fredrick. M. Nafukho, 2022-08-01

Training School Principals as Talent Developers An International Perspective focuses on how to prepare school principals to lead their schools by training and supporting teachers in their craft. The main goal of schools is improving teaching and learning in order to maximize students' potential to be college ready and career ready. Principals play a significant role in improving the instructions which improves students' learning. In order to do so we need inspiring principals to be talent developers. The book is comprised of chapters written by faculty and researchers from various countries and offers multiple perspectives on training and developing principals to be talent developers. In the ten chapters of this edited book we wanted to address the perspectives of who is the role model of a principal, what are the qualities needed to make a good principal, and what are the challenges that the talent developer principals encounter to achieve their goals. We also wanted to broaden the lens by addressing these perspectives in the United States and globally.

Meeting the Challenges to Measurement in an Era of Accountability Henry Braun, 2016-01-29

Under pressure and support from the federal government, states have increasingly turned to indicators based on student test scores to evaluate teachers and schools as well as students themselves. The focus thus far has been on test scores in those subject areas where there is a sequence of consecutive tests such as in mathematics or English language arts with a focus on grades 4-8. Teachers in these subject areas, however, constitute less than thirty percent of the teacher workforce in a district. Comparatively little has been written about the measurement of achievement in the other grades and subjects. This volume seeks to remedy this imbalance by focusing on the assessment of student achievement in a broad range of grade levels and subject areas with particular attention to their use in the evaluation of teachers and schools in all. It addresses traditional end-of-course tests as well as alternative measures such as portfolios, exhibitions, and student learning objectives. In each case, issues related to design and development, psychometric considerations, and validity challenges are covered from both a generic and a content-specific perspective.

The NCME Applications of Educational Measurement and Assessment series includes edited volumes designed to inform research-based applications of educational measurement and assessment. Edited by leading experts, these books are comprehensive and practical resources on the latest developments in the field.
