Collaborative Practice Connie Healy, 2017-09-19 Collaborative practice is a new method of dispute resolution used mainly in family law matters By taking a non adversarial approach it challenges the strictly positivist view of the lawyer as zealous advocate for the client As such it has received much criticism from the established Bar and legal profession This book provides a doctrinal and empirical analysis of collaborative practice with a view to assessing its place within the dispute resolution continuum and addressing whether this criticism has been justified It begins by establishing the theoretical underpinnings of conflict and differing approaches to conflict resolution the impact of the comprehensive law movement and therapeutic jurisprudence The origins and development of the collaborative process and the framework it provides for a multidisciplinary approach to conflict resolution is outlined The book addresses the examination of the process undertaken in the lead up to the enactment of the Uniform Collaborative Law Act in 2010 now

regarded as a model of best practice Finally through an examination of empirical research undertaken in the US Canada and in England and Wales and in presenting the results of the first known empirical research into the process in an Irish family law context the book concludes with an evidenced based analysis of the process from the perspective of couples who chose to use the collaborative model to resolve the issues surrounding their relationship breakdown collaborative lawyers and lawyers who do not advocate a non adversarial approach As such this book provides a valuable insight into the process which will be of interest to academics practising lawyers members of the judiciary researchers in the fields of conflict resolution and family law and for students studying alternative dispute resolution ADR
