

# minerals

Minerals are very interesting and are lots of fun to learn	11
about. They are a solid and have never been alive. Minerals	22
were formed in nature. We identify or name minerals by their	33
properties. One property that we look at is how hard a	44
mineral is. When we test or measure a mineral's hardness	54
that is called a scratch test. The hardest mineral is a	65
diamond, and the softest mineral is talc. We use a streak	76
test to help identify minerals. In a streak test, we rub a	88
mineral on an unglazed, white tile and see what color streak	99
it leaves behind. Luster is the reflection of light from a	110
mineral. Minerals with a lot of luster look shiny. Sometimes	120
minerals are the same color, which is why we often cannot	131
use color to identify minerals.	136

- What are minerals?
- How do we measure hardness?
- What is luster?
- Why is color not always a good way to identify minerals?
