Hinton, 2015 *Genocide and Mass Violence* brings together a unique mix of anthropologists psychiatrists psychologists and historians to examine the effects of mass trauma *Empire, Ideology, Mass Violence: The Long 20th Century in Comparative Perspective* Tobias Hof, 2016-09-20 Despite the vast literature on genocide and mass violence during the 19th and 20th century one question still haunts historians and the wider public alike Why do ordinary men use extreme violence against fellow human beings *Empire Ideology Violence The Long 20th Century in Comparative Perspective* offers innovative methods and interdisciplinary approaches to the study of extreme violence in the long 20th century By looking at case studies from different regions and time periods the contributors shed more light on the social political and economic contexts in which humans are inclined to use extreme forms of violence Topics in the volume include case studies from Asia Africa Europe the Ottoman Empire and the Nazi Third Reich *Biosocial Worlds* Jens Seeberg, Andreas Roepstorff, Lotte Meinert, 2020-09-29 *Biosocial Worlds* presents state of the art contributions to anthropological reflections on the porous boundaries between human and non human life biosocial worlds Based on changing understandings of biology and the social it explores what it means to be human in these worlds Growing separation of scientific disciplines for more than a century has maintained a separation of the natural and the social that has created a space for projections between the two Such projections carry a directional causality and so constitute powerful means to establish discursive authority While arguing against the separation of the biological and the social in the study of human and non human life it remains important to unfold the consequences of their discursive separation Based on examples from Botswana Denmark Mexico the Netherlands Uganda the UK and USA the volume explores what has been created in the space between the social and the natural with a view to rethink the biosocial Health topics in the book include diabetes trauma cancer HIV tuberculosis prevention of neonatal disease and wider issues of epigenetics Many of the chapters engage with constructions of health and disease in a wide range of environments and engage with analysis of the concept of environment Anthropological reflection and

ethnographic case studies explore how health and environment are entangled in ways that move their relation beyond interdependence to one of inseparability The subtitle of this volume captures these insights through the concept of health environment seeking to move the engagement of anthropology and biology beyond deterministic projections *Trauma and Recovery in Early North African Christianity* Scott Harrower, 2024-04-22 Powerful religious elements for living in the aftermath of trauma are embedded within North African Christian hagiographies The texts of 1 The Passion of Perpetua and Felicity 2 The Account of Montanus Lucius and their Companions and 3 The Life of Cyprian of Carthage are stories that offered post traumatic pathways to recovery for its historical readership These recovery oriented beliefs and behaviors promoted positive religious coping strategies that revolved around a sense of safety re establishing community relationships an integrated sense of self and a hopeful story beyond trauma This book vividly demonstrates that hagiographies played a vital therapeutic role in helping early Christian trauma survivors recover and flourish in the aftermath of disastrous persecutions
