Design and Implementation of a service-oriented Information System Architecture based on a Case Study

Tobias Thiel, 2007-04-02 Inhaltsangabe

Abstract In today's companies changes happen very fast On the one hand more and more new technologies are arising on the other hand business processes have to change because of mergers and acquisitions new regularities changing customer requirements and so forth As business processes are supported by information technology information technology has to cope with both types of changes From a business perspective on demand adaptation of information technology to business is required Service oriented architecture SOA is currently discussed as an opportunity to better adapt to those changes According to Gartner's hype cycle for emerging technologies SOA already crossed the peak and is now in the trough of disillusionment But SOA is far from being unfashionable as it would be expected during this phase There is still high media coverage and a lot of SOA books have been published recently or will be published during the next months What is true however is that the expectations are getting more realistic and people start to think about the real benefits This is probably due to the fact that companies experienced that implementing an SOA is not as fast and easy as the marketing hype might have given the impression Although the hype surrounding SOA is immense the concept is still in its early childhood with regards to concrete implementations According to a survey conducted by Experton Group only three percent of 110 German enterprises all with over 100 Employees have a SOA based solution in place Besides high costs expected from migration to SOA the lack of SOA know how is identified as a main reason As the survey reveals 45 percent of the interviewed enterprises have nearly no knowledge or no knowledge about SOA at all Another 38 percent have only basic knowledge The lack of knowledge is confirmed by a survey from the research company Quocirca which found out based on a sample size of 1500 that 30 percent of respondents have absolutely no knowledge about SOA and 25 percent have only minimal knowledge Similar results are found among enterprises using SAP software The results of an online survey conducted by the German speaking SAP User Group DSAG shows that 64 percent of 344 enterprises are just a little or not at all familiar with enterprise SOA and only every fifth enterprise has developed a platform strategy Furthermore enterprise SOA is still a topic of the IT department although it would be

Methods of IT Project Management, Fifth Edition

Jeffrey L. Brewer, Kevin C. Dittman, Paul J. Thomas, 2025-09-15. Designed for graduate advanced undergraduate and practitioner project management courses with an information technology focus. Methods of IT Project Management is designed around the Project Management Body of Knowledge PMBOK incorporating material from the latest seventh edition while still maintaining the book's process approach. The text provides students with all the concepts, techniques, artifacts and methods found in the leading project management reference books and modern development methodologies: agile, hybrid and traditional, while also conveying practical knowledge that can immediately be applied in real world settings. This book uniquely integrates cutting edge knowledge and techniques from the industry ensuring that readers are equipped with the most current and relevant skills. Unlike other books in this area, the material is organized according to the sequence of a generic project life cycle from project selection to initiation, planning, execution, control and iteration or project closeout. Following this life cycle approach as opposed to covering the material by knowledge area or project performance domain allows new learners to simultaneously study project management concepts and methods as they develop skills they can use immediately during and upon completion of the course. The text's structure also allows different programs to use the book during real world projects.
