- Note: Access automatically saves a record when you go to another record.
- Notice there is an ID column. This is your primary key, which is a field that contains a unique value for each record in a table, such as social insurance number, employee number, or natural number. This is important if you want to combine tables.
- Last is called a Field Name, and the name Smith is called a Field Content.

Working with Records and Fields

- In Datasheet view for a table, you can select a record by clicking the area to the left of the record or a field by clicking the field name. To select all the records in a file, click the blank area to the left of the field names. Once selected, these can be cut, copied, or deleted.
- Click on the cell containing the first name Dan.
- From the Fields & Columns Dialogue
- Notice where the column went field.
- From the same location, select the Click Yes.
- You can also change the order of field you want to move, then use the mouse to grab and drag the field name to the new location. A vertical black line indicates where the new column will go.
