International Accounting aims to address a vital gap in research by focusing on providing relevant and timely studies on International Financial Reporting Standards implementation for local and international policymakers *Services for Trade Competitiveness* Claire H. Hollweg,Sebastián Sáez,2019-07-15 Recognizing that services affect the ability of countries and their firms to compete on international markets the World Bank's Trade and Regional Integration Unit has developed an extensive work program to promote the performance of countries domestic services sectors including services trade *Services for Trade Competitiveness* presents selected applications of new methodologies that were developed to assess the competitiveness of countries services sectors discern the types of barriers to services that exist in the regulatory environment and identify the resulting policy implications Its assessments are designed for a wide audience including policy makers in developing countries and development practitioners in international organizations policy making institutions and academia The purpose of this book is to help policy makers in developing countries make informed policy choices to increase their chances of benefiting from the increasing prominence of services in international trade Financial Resources for Development in Myanmar Myat Thein,2000 Much attention has been paid to the increasingly substantial inflows of foreign direct investment into Myanmar since the country opened its doors to overseas investors in late 1988 In addition to bringing capital in the form of cash such investment has also introduced new technology training and skills business and management acumen as well as various other inputs that Myanmar undoubtedly requires if the country is to develop However there is a growing realization that FDI inflows alone will not enable the country to meet the ambitious economic growth targets As evidenced by the Asian Tiger economies there is also a need for considerable amounts of domestic capital and in order to attain substantial levels of domestic investment a system of domestic savings vehicles that the state and industry can harness must be developed Hence this volume seeks to examine ways in which domestic savings and investment capital can be encouraged and increased The contributors include not only Myanmar economists and policy makers but also experts from ASEAN and Japan who share their experiences **Myanmar** International Monetary Fund. Asia and Pacific Dept,2020-03-26

This 2019 Article IV Consultation focuses on Myanmar's near and medium term challenges and policy priorities and was prepared before COVID 19 became a global pandemic and resulted in unprecedented strains in global trade commodity and financial markets. It therefore does not reflect the implications of these developments and related policy priorities. These developments have greatly amplified uncertainty and could heighten downside risks around the outlook. The IMF staff is closely monitoring the situation including related policy responses from the authorities and will continue to work on assessing its impact in the Myanmar economy. Although long term prospects remain favorable, near term growth is likely to remain below potential as the correction in real estate market and continued uncertainty weighs on investor sentiment in the runup to the 2020 elections. Starting FY2020-21, bank deleveraging will further slow credit and constrain gross domestic product growth as borrower's true ability to repay is revealed with term loans coming due and banks restructure in earnest.

The Report: Myanmar 2014 Oxford Business Group, 2014-03-03. The Golden Land, officially known as the Republic of the Union of Myanmar and formerly as Burma, has undergone dramatic reforms in recent years under the administration of President U Thein Sein. The rapid transition from a military junta to an open economy has surprised the global community and will see Myanmar assume the ASEAN chair for the first time in 2014. Known as the last frontier market, Myanmar is rich in natural resources and has an established extractive industries sector with one of the world's oldest continuously producing oil fields. The country also enjoys significant mineral resources which remain greatly under-explored by international mining firms, something the government is proactively trying to change. The easing of economic sanctions has accelerated the nation's economic growth, but Myanmar still faces political challenges.

including ongoing ethnic conflict and religious tensions However with greater access to international markets and a growing number of business opportunities investors are cautiously optimistic about the country s future Human Settlements Sector Review: Union of Myanmar , **Connecting Asia** Michael G.
