Extracting Insights from Digital Public Health Data using Artificial Intelligence Yu-Dong Zhang,Hong Lin,João Manuel R.

S. Tavares, Steven Fernandes, 2022-12-05 Computational Engineering of Historical Memories Andrea Nanetti, 2022-09-26

Nanetti outlines a methodology for deploying artificial intelligence and machine learning to enhance historical research. Historical events are the treasure of human experiences, the heritage that societies have used to remain resilient and express their identities. Nanetti has created and developed an interdisciplinary methodology supported by practice-based research that serves as a pathway between historical and computer sciences to design and build computational structures that analyse how societies create narratives about historical events. This consilience pathway aims to make historical memory machine understandable. It turns history into a computational discipline through an interdisciplinary blend of philological accuracy, historical scholarship, history-based media projects, and computational tools. Nanetti presents the theory behind this methodology from a humanities perspective and discusses its practical application in user interface and experience. An essential read for historians and scholars working in the digital humanities.

Museum Media Michelle Henning, 2020-11-17

MUSEUM MEDIA Edited by Michelle Henning. *Museum Media* explores the contemporary uses of diverse media in museum contexts and discusses how technology is reinventing the museum. It considers how technological changes from photography and television through to digital mobile media have given rise to new habits, forms of attention, and behaviors. It explores how research methods can be used to understand people's relationships with media technologies and display techniques in museum contexts, as well as the new opportunities media offer for museums to engage with their visitors. Entries written by leading experts examine the transformation of history and memory by new media, the ways in which exhibitions mediate visitor experience, how designers and curators can establish new kinds of relationships with visitors, the expansion of the museum beyond its walls and its insertion into a wider commercial and corporate landscape. Focusing on formal, theoretical, and technical aspects of exhibition practice, this in-depth volume explores questions of temporality, attachment to objects, atmospheric and immersive exhibition design, the reinvention of the exhibition medium, and much more.

The Routledge Handbook of Liberal Naturalism Mario De Caro, David Macarthur, 2022-03-14

The central question of naturalism, the relation of philosophy to science, was one of the defining strands of twentieth-century thought and remains a major source of debate and controversy. Today many argue that philosophy should fold itself into the sciences, especially the natural sciences. Liberal naturalists argue that such scientific naturalism demands reductive and Procrustean conceptions of knowledge and reality. Moreover, many philosophical problems are beyond the scope of the sciences, such as the nature of persons, the normativity of the space of reasons, and how best to understand the peculiar mix of objectivity and subjectivity of ethics and art. The Routledge Handbook of Liberal Naturalism is the first collection to present a comprehensive overview of liberal naturalism, a philosophical outlook that lies between scientific naturalism and supernaturalism. Comprising 37 chapters by an international team of contributors, it examines important cutting-edge topics, including what is liberal naturalism, is metaphysics a viable project, naturalism in the history of philosophy, including Hume, Dewey, and Quine, contemporary liberal naturalists such as P. F.

Strawson John McDowell Hilary Putnam and John Rawls related kinds of naturalism including subject naturalism common sense naturalism and biological naturalism the bearing of liberal naturalism on contemporary debates in epistemology philosophy of mind ethics and aesthetics Essential reading for students and researchers in all areas of philosophy this volume will be of particular interest for those studying philosophical naturalism philosophy of science metaphysics epistemology philosophy of mind ethics and aesthetics

The Study of Science and Religion Carl Reinhold Brakenhielm, 2018-06-06

The main aim of this book is to contribute to the relationship between science and religion This book aims to do constructive theological work out of a particular cultural context The point of departure is contemporary Swedish religion and worldviews One focus is the process of biologization i e how the worldviews of the general public in Sweden are shaped by biological science Is there a gap between Swedes in general and the perceptions of Swedish clergy The answer is based on sociological studies on science and religion in Sweden and the United States Furthermore the book contains a study of Swedish theologians from Nathan Soderblom to the present Archbishop Antje Jackelen and their shifting understanding of the relation between science and religion The philosophical aspects of this relation are given special consideration What models of the relation inform the contemporary scholarly discussion Are science and religion in conflict separate or in mutual creative interaction

Pitman's Journal of Commercial Education ,1892

Thinking Ethnographically Paul

Atkinson, 2017-05-08 Written by a leading authority this book discusses a wide range of analytic ideas that can and should inform ethnographic analysis In introducing the notion of granular ethnography it argues for an approach to qualitative research that is sensitive to the complexities of everyday social life A much needed antidote to superficial research and analysis the text deals not merely with the practical methods of fieldwork but with the far more ambitious enterprise of turning ethnographic data into productive ideas and concepts Paul Atkinson enables us not merely to do ethnography but truly to think ethnographically His book will prove invaluable to students and researchers across the social sciences

Knowledge and Change in African Universities Michael Cross, amasa ndofirepi, 2017-01-28 Besides the ongoing concern with the epistemological and theoretical hegemony of the West in African academic practice the book aims at understanding how knowledge is produced and controlled through the interplay of the politics of knowledge and current intellectual

discourses in universities in Africa In this regard the book calls for African universities to relocate from the position of object to subject in order to gain a form of liberated epistemological voice more responsive to the social and economic complexities of the continent In itself this is a critical expos of contemporary practices in knowledge advancement in the continent Broadly the book addresses the following questions How can African universities reinvent knowledge production and dissemination in the face of the dominant Eurocentricism so pervasive and characteristic of academic practice in Africa to enhance their relevance to the contexts in which they operate How can such change particularly at knowledge production and distribution levels be undertaken without falling into an intellectual and discursive ghettoization in the global context What then is the role of academics policy makers and curriculum and program designers in dealing with biases and distortions to integrate policies knowledge and pedagogy that reflect current cultural diversity both local and global Against this backdrop while some contributions in this book argue that emancipatory epistemic voice in African universities is not yet born or it is struggling with little success many dissenting voices charge that if Africans do not take responsibility and construct knowledge strategies for their own emancipation who will

Natural Sciences 2014 Question Paper Final: Bestsellers in 2023 The year 2023 has witnessed a noteworthy surge in literary brilliance, with numerous compelling novels captivating the hearts of readers worldwide. Lets delve into the realm of popular books, exploring the engaging narratives that have charmed audiences this year. Natural Sciences 2014 Question Paper Final : Colleen Hoover's "It Ends with Us" This touching tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover masterfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can prevail. Natural Sciences 2014 Question Paper Final : Taylor Jenkins Reid's "The Seven Husbands of Evelyn Hugo" This spellbinding historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reid's absorbing storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Natural Sciences 2014 Question Paper Final : Delia Owens' "Where the Crawdads Sing" This mesmerizing coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens weaves a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These top-selling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of compelling stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is an exceptional and thrilling novel that will keep you speculating until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
