Animal Ethics in Context Clare Palmer, 2010 It is widely agreed that because animals feel pain we should not make them suffer gratuitously Some ethical theories go even further because of the capacities that they possess animals have the right not to be harmed or killed These views concern what not to do to animals but we also face questions about when we should and should not assist animals that are hungry or distressed Should we feed a starving stray kitten And if so does this commit us if we are to be consistent to feeding wild animals during a hard winter In this controversial book Clare Palmer advances a theory that claims with respect to assisting animals that what is owed to one is not necessarily owed to all even if animals share similar psychological capacities Context history and relation can be critical ethical factors If animals live independently in the wild their fate is not any of our moral business Yet if humans create dependent animals or destroy their habitats we may have a responsibility to assist them Such arguments are familiar in human cases we think that parents have special obligations to their children for example or that some groups owe reparations to others Palmer develops such relational concerns in the context of wild animals domesticated animals and urban scavengers arguing that different contexts can create different moral relationships

Ward, 2011-09-15 This book is a comprehensive introduction to media ethics and an exploration of how it must change to adapt to today's media revolution Using an ethical framework for the new mixed media ethics taking in the global interactive media produced by both citizens and professionals Stephen J A Ward discusses the ethical issues which occur in both mainstream and non mainstream media from newspapers and broadcast to social media users and bloggers He re defines traditional conceptions of journalistic truth seeking objectivity and minimizing harm and examines the responsible use of images in an image saturated public sphere He also draws the contours of a future media ethics for the new mainstream media and puts forward cosmopolitan principles for a global media ethics His book will be invaluable for all students of media and for others who are interested in media ethics

Works Righteousness Anna L. Peterson, 2020-10-19 In *Works Righteousness* Anna L Peterson examines the place of practice in contemporary ethical theory Peterson argues that rather than assuming that pre established moral ideas guide action ethicists should acknowledge and explore the relationship between ideas actions and results Both an analysis of alternative models in which practice plays a stronger role and an argument for taking practice more seriously in broad questions of ethics as well as in concrete case studies *Works Righteousness* contends that what we do generates and alters our values just as often as expressed values motivate or guide the ways we act Peterson here challenges prevailing philosophical and religious theories that ideas are what truly matter underlining the value of attention to people's concrete experiences and highlighting the relevance of theoretical insights to contemporary social issues such as climate change euthanasia and hate speech Through examinations of pragmatism Marxism and religious pacifism all of which significantly highlight a practice focused approach *Works Righteousness*

Buyondo,2024-10-31 In pursuing a holistic bioethics while dialoguing with different sciences appreciation of moral affinities between human and nonhuman entities Dr Buyondo argues for a minimum moral status for nonhuman entities The minimum normative basics of approaches to biomedical ethics are at the very least not distinctive to either human animals or nonhuman animals only The investigation builds further on the African understanding of life where no creation is lifeless In establishing a more inclusive functional bioethics the African approach goes further than biocentrism ecocentrism and holism to ground an inclusive African holistic moral egalitarianism suggesting that all forces and all created things have life We are not emphasizing how every system and creature command equal respect rather everything has life commands respect and moral concern as a minimum imperative within a Black African holistic approach to bioethics However holistic bioethics can neither be Western nor an African invention that people of other cultures only admire from a distance Moreover holistic bioethics doesn't offer the last word on the ethics of nonhuman animals holistic anamnetic solidarity the relational Other and intercultural theological bioethics Nursing Law and Ethics John Tingle,Alan Cribb,2013-09-18 Nursing Law and Ethics

Anthropological Realism Stephen J. A. Ward,Clifford G. Christians,2024-03-19 Anthropological Realism is a new theory of ethics that transforms static moral principles into global normative ideals Two prominent weaknesses in the field provide the rationale for this book First as a discipline ethics lacks a strong theoretical basis A second concern is moral parochialism Technologies are global but international perspectives rarely reflect an ethics anchored in humanity as a whole Progress in developing a moral globalism as the basis for ethics has been prevented by unproductive dualisms that lead to stalemates

Ethics is typically divided into opposites such as individual and society consequentialism and deontology and local and global To deal constructively with this history of unproductive disputes the book focuses on a fundamental rivalry in philosophical ethics the opposition between realism and anti realism To move the field forward the authors create a next generation moral theory of hybrid moral realism that promotes a sustainable global ethics of humaneness and human flourishing
