strengthen states and corporations It does this by sketching out the contours objects methods and ontologies of a disciplinary framework which rejects commonplace assumptions of value freedom From Social Harm to Zemiology advocates social change in accordance with groups who are most disenfranchised and thus often most socially harmed An accessible and compelling read this book is essential reading for all zemiologists critical criminologists and those engaged with criminological and social theory **The Oxford Handbook of Criminology** Alison Liebling, Shadd Maruna, Lesley McAra, 2017 Beginning with the history of criminology this updated and revised edition deals with topics as diverse as policing substance abuse juvenile crime statistics prisons victims and organised crime in Britain *Historical Pollution* Francesco Centonze, Stefano Manacorda, 2017-08-05 This volume examines legal matters regarding the prevention and fighting of historical pollution caused by industrial emissions Historical pollution refers to the long term or delayed onset effects of environmental crimes such as groundwater or soil pollution Historical Pollution presents and compares national legal approaches including the most interesting and effective mechanisms for managing environmental problems in relation with historical pollution It features interdisciplinary and international comparisons of traditional and alternative justice mechanisms This book will be of interest to researchers in criminology and criminal justice and related areas such as politics law and economics those in the public and private sectors dealing with environmental protection including international institutions corporations specialized national agencies those involved in the criminal justice system and policymakers

Assessing the Harms of Crime Victoria A. Greenfield, Letizia Paoli, 2022-04-28 Assessing the Harms of Crime provides a firm analytical foundation for making normative decisions about criminal and related policy taking harm and its reduction as a conceptual starting point and supplying the means for systematic empirical analysis in a harm assessment framework By exploring harm s place in legal history theory criminology and related fields and by considering the relevance of harm and its reduction for both criminal policy and the governance of security the book demonstrates the centrality of harm including its reduction to crime policy and governance It also highlights a substantial gap in methods available to the policy community to take on harm and the challenges of developing them Working to fill that gap the book presents the authors Harm Assessment Framework consisting of tools and a process to identify evaluate and rank harms and to carefully distinguish between harms that result directly from activities and those that are remote or driven at least partially by policy The book also presents applications to complex crimes primarily involving coca and cocaine that show the framework s value with new actionable insight to harm and policy On this basis the book argues that criminology would benefit from expanding its mission to include harm and target harm reduction and from positioning harm assessment as a core task Lastly it posits that systematic empirical harm based policy analysis can contribute positively to decisions about criminal policy and the governance of security and to advancing justice
