

**NOTE:** After you read the manual, it should be stored in the vehicle for convenient reference and remain with the vehicle when sold so that the new owner will be aware of all safety warnings.

When it comes to service, remember that your authorized dealer knows your vehicle best, has the factory-trained technicians and genuine MOPAR® parts, and is interested in your satisfaction.

#### **ROLLOVER WARNING**

Utility vehicles have a significantly higher rollover rate than other types of vehicles. This vehicle has a higher ground clearance, higher center of gravity, and narrower track than many passenger cars. It is capable of performing better in a wide variety of off-road applications. Driven in an unsafe manner, all vehicles can be caused to go out of control. Because of the higher center of gravity and the narrower track, if this vehicle is out of control it may roll over when some other vehicles may not.

Operating this vehicle at excessive speeds or while intoxicated may result in loss of control, collision with other vehicles or objects, going off the road, or overturning, any of which may lead to serious injury or death. Also, **failure to use standard seat belts** subjects the driver and passengers to a greater risk of being thrown out of an open-body vehicle than out of a closed vehicle in an accident which can result in injury or death.

Although your vehicle may be equipped with a soft top or optional hard top to give the occupants protection from the weather, these tops do not offer structural protection in the event of an accident and do not change the open-body characteristic of the vehicle. Even though your vehicle has a sport bar and side bars for some extra protection, it is a truly open vehicle—there is no structural integrated top and it has low sides and a folding windshield. Many of these vehicles do not have fully enclosed hard doors.
