Contemporary Intellectual Assessment, Third Edition Dawn P.

Flanagan, Patti L. Harrison, 2012-01-24 In one volume this authoritative reference presents a current comprehensive overview of intellectual and cognitive assessment with a focus on practical applications. Leaders in the field describe major theories of intelligence and provide the knowledge needed to use the latest measures of cognitive abilities with individuals of all ages from toddlers to adults. Evidence-based approaches to test interpretation and their relevance for intervention are described. The book addresses critical issues in assessing particular populations including culturally and linguistically diverse students, gifted students, and those with learning difficulties and disabilities in today's educational settings. New to This Edition: Incorporates major research advances and legislative and policy changes. Covers recent test revisions plus additional tests: the NEPSY II and the Wechsler Nonverbal Scale of Ability. Expanded coverage of specific populations: chapters on autism spectrum disorders, attention deficit hyperactivity disorder, sensory and physical disabilities, and traumatic brain injury and intellectual disabilities. Chapters on neuropsychological approaches, assessment of executive functions, and multi-tiered service delivery models in schools. *Guidelines for Identifying Students with Perceptual/communicative Disabilities*, 2001

Academic Assessment and Intervention Steven Little, Angeleque Akin-Little, 2014-01-21 Serving students with academic deficiencies necessitates communication and collaboration among professionals from several disciplines. *Academic Assessment and Intervention* brings together divergent approaches in order to demonstrate that scientific evidence rather than biases or previous practice must determine assessment practices that are selected and used for particular purposes. Similar to a handbook in its comprehensive topical coverage, this edited collection provides a contextual foundation for academic assessment and intervention, describes both norm-referenced and curriculum-based assessment measurement in detail, considers the implications of both of these assessments on ethnically diverse populations, provides a clear link between assessment evidence-based interventions and the RTI model, and considers other important topics related to this area such as teacher behavior. Intended primarily for graduate-level courses in education, school psychology, or child clinical psychology, it will also be of interest to practicing professionals in these fields. *A Compendium of Neuropsychological Tests* Esther Strauss, Elisabeth M. S. Sherman, Otfried Spreen, 2006-04-06 For the practicing neuropsychologist or researcher keeping up with the sheer number of newly published or updated tests is a challenge, as is evaluating the utility and psychometric properties of neuropsychological tests in a clinical context. The goal of the third edition of *A Compendium of Neuropsychological Tests*, a well-established neuropsychology reference text, is twofold. First, the Compendium is intended to serve as a guidebook that provides a comprehensive overview of the essential aspects of neuropsychological assessment practice. Second, it is intended as a comprehensive sourcebook of critical reviews of major neuropsychological assessment tools for the use by practicing clinicians and researchers. Written in a comprehensive, easy-to-read reference format and based on an exhaustive review of research literature in neuropsychology, neurology, psychology, and related disciplines, the book covers topics such as basic aspects of neuropsychological assessment as well as the theoretical background, norms, and the

utility reliability and validity of neuropsychological tests For this third edition all chapters have been extensively revised and updated The text has been considerably expanded to provide a comprehensive yet practical overview of the state of the field Two new chapters have been added Psychometrics in Neuropsychological Assessment and Norms in Psychological Assessment The first two chapters present basic psychometric concepts and principles Chapters three and four consider practical aspects of the history taking interview and the assessment process itself Chapter five provides guidelines on report writing and chapters six through sixteen consist of detailed critical reviews of neuropsychological tests and address the topics of intelligence achievement executive function attention memory language visual perception somatosensory olfactory function mood personality and response bias A unique feature is the inclusion of tables that summarize salient features of tests within each domain so that readers can easily compare measures Additional tables within each test review summarize important features of each test highlight aspects of each normative dataset and provide an overview of psychometric properties Of interest to neuropsychologists neurologists psychiatrists and educational and clinical psychologists working with adults as well as pediatric populations this volume will aid practitioners in selecting appropriate testing measures for their patients and will provide them with the knowledge needed to make empirically supported interpretations of test results
