Towards applying a green infrastructure approach in the Gauteng City-Region Christina Culwick,Samkelisiwe Khanyile,Kerry Bobbins,Stuart Dunsmore,Anne Fitchett,Lerato Monama,Raishan Naidu,Gillian Sykes,Jennifer van den Bussche,Marco Vieira,2019-12-11 In the context of heightened climate variability thinking about ways to redesign our urban areas with more sustainable infrastructure solutions is becoming more and more important Green infrastructure GI is emerging as an alternative approach to traditional grey infrastructure in urban planning and development Its emergence can be understood in terms of the growing demand for infrastructure and services increased concerns over natural resource constraints and climate change and the negative impacts associated with traditional approaches to designing and building cities It has been proposed that GI can provide the same services as traditional infrastructure at a similar capital cost while also providing a range of additional benefits However despite the increasing examples of successful urban GI applications traditional infrastructure continues to dominate due to the lack of systematic evidence to support GI implementation As a result there has been an increase in calls from policy and decision makers for a greater evidence base on the benefits of GI as well as for practical guidelines on its implementation Towards applying a green infrastructure approach in the Gauteng City Region is the GCRO's third report in its ongoing research into Green assets and infrastructure The first two reports in this project series were more theoretically grounded and policy oriented whereas this third report is more practical in nature The first report explored the basic principles around GI assessed the extent of ecological features in Gauteng and the way governments in the province think about planning and maintenance of green assets The second report responded to some of the challenges identified in the first report and in particular the importance of government officials and practitioners in exploring how international green infrastructure plans could be applied in the Gauteng context This third report builds on the findings of the aforementioned reports and the project's CityLab series which highlighted the need to build an evidence base as critical for garnering

support for and as well as enhancing investment in the GI approach Unlike the more theoretically grounded earlier reports this report comprises four technical sections and practical reflections on how a GI approach could be incorporated into urban planning in the GCR and in other similar urban contexts AASHTO Transportation Asset Management Guide American Association of State Highway and Transportation Officials,2011 Aims to encourage transportation agencies to address strategic questions as they confront the task of managing the surface transportation system Drawn from both national and international knowledge and experience it provides guidance to State Department of Transportation DOT decision makers as well as county and municipal transportation agencies to assist them in realizing the most from financial resources now and into the future preserving highway assets and providing the service expected by customers Divided into two parts Part one focuses on leadership and goal and objective setting while Part two is more technically oriented Appendices include work sheets and case studies **Municipal Asset Management Toolkit (Guidelines for Local Decision Makers)** Network of Associations of Local Authorities of South-East Europe, **Audit and Accounting Guide** AICPA,2018-07-11 With all the recent changes in state and local government audit and accounting including changes to some of the more complex areas such as pensions and post employment benefits other than pensions OPEB accountants and financial managers can't afford to be without the most current guidance This authoritative guide provides complete coverage of audit and accounting considerations critical for both preparers and auditors This edition includes two new schedules Governmental Employer Participation in Single Employer Plans Illustrative Schedule of Pension Amounts and Report and Illustrative Notes to Schedule of Employer Allocations and Schedule of Pension Amounts It also provides insights comparisons and best practices for financial reporting and the financial reporting entity revenue and expense recognition capital asset accounting the elements of net position accounting for fair value municipal securities offerings tax abatements and much more **15th WCEAM Proceedings** João Onofre Pereira Pinto,Marcio Luiz Magri Kimpura,Renata Rezende Reis,Turuna Seecharan,Belle R. Ba,2022-01-23 **Managing Government Property Assets** Olga Kaganova,2006 Governments own a vast array of real property from large stretches of land to public housing projects from water distribution systems and roads to office buildings Typically management of public property is highly fragmented with responsibility for each type of asset falling within a different agency or bureaucracy In almost all countries different classes of property are managed according to their own rules often following traditional practices rather than any assessment of what type of management is appropriate Over the past decade however a new discipline has emerged that examines this important component of public wealth and seeks to apply standards of economic efficiency and effective organizational management Managing Government Property Assets reviews and analyzes this recent wave of activity The authors draw upon a wide variety of national and local practices both in countries that have been leaders in management reforms and in countries just beginning to wrestle with the problem This comparison reveals that the issues of public property management are surprisingly similar in different countries despite striking differences in institutional contexts and policy solutions
