The lesson planning process guides teachers to: Identify the mathematical content, language, and social learning intentions for a lesson or unit and connect goals to success criteria; Determine the purpose of a math lesson you're planning by distinguishing between conceptual understanding, procedural fluency, and transfer; Select worthwhile tasks and materials that make the best use of representations, manipulatives, and other instructional tools and resources; Choose the format of your lesson using reasoning and number routines, games, whole class discussion, and pairs or small group work; Anticipate student misconceptions and evaluate understanding using a variety of formative assessment techniques; Decide how you'll launch your lesson, facilitate questioning, encourage productive struggle, and close your lesson.
