

1. **Maximum flow algorithm:** One source and one sink identified and labeled. The flow network consists of directed edges and flow values representing flow rate between nodes. The flow network must satisfy the capacity constraint, flow conservation, and source and sink constraints. The flow value must be non-negative. The flow value must be less than or equal to the capacity of the edge. The flow value must be less than or equal to the flow value of the edge. The flow value must be less than or equal to the flow value of the edge.
