Historic Design Guidelines:

Glen Ridge Historic Design Guidelines Steven Smolyn, 2021-09-29 The HPC created Design Guidelines for the Glen Ridge Historic District to codify the long standing design principles utilized in the review and approval of renovations repairs and expansion of properties in Glen Ridge Funded by a grant from the New Jersey Historic Preservation Office and the National Park Service these guidelines provide an easy to use reference document for residents architects and contractors to plan projects and facilitate the HPCs design review process The Design Guidelines are intended to further the appreciation of the architecture setting and history of Glen Ridge to help ensure consistency in local decision making and to benefit property owners by clarifying community expectations These Design Guidelines offer information on the rehabilitation of existing buildings including new additions and new construction to offer a common body of knowledge for all participants in the review process including Commission members The HPC recognized that applying design guidelines is often challenging especially in Glen Ridge where there is so much variety in the architecture These Design Guidelines are intended to codify the objective basis for the HPC s decisions and help increase public awareness of historically appropriate design However the Design Guidelines do not offer all of the answers or solutions to a homeowner or design team as good architectural design cannot be achieved only by applying a set of rules The challenge for both the homeowner and the HPC member is knowing how to apply the Design Guidelines to make sound judgments that will help preserve the architectural character of Glen Ridge while also allowing expressions of change and adaptation *City of San Antonio Historic Design Guidelines* San Antonio (Tex.). Office of Historic Preservation, 2012 *Historic Design Guidelines* Baltimore County Landmarks Preservation Commission, 1991 **Design Guidelines Mt. McKinley Park Headquarters Historic District** Heather Feil, 2016 These design guidelines are intended to provide a framework for determining the appropriate architectural character of new and existing buildings and structures within Mount McKinley National Park Headquarters Historic District These design guidelines go beyond basic universal principles of good design and focus on the character qualities that are reflected in and contribute to the distinctiveness of Denali National Park and Preserve Page 9 **Design Guidelines in American Cities** John Punter, 1999-01-01 This book is a study of design initiatives and policies in five US West Coast cities Seattle including Bellevue Portland San Francisco Irvine and San Diego all of which have had particularly interesting urban design experience of relevance to practice in Britain and other countries Although these cities are not a representative sample of all American design practice they provide a rich vein of ideas about recent policy development and current initiatives which will stimulate thought about the formulation of effective design controls The presentation of substantial extracts from key documents that underpin design controls in the five cities will be of interest inspiration and practical use to academics and practitioners who want to know more about American practice and who want to contribute to improvements in the standards and quality of urban design policies and design control The opening chapter provides a national context and a comparative framework for

the study with a focus on international perspectives American planning systems and the development of criteria for comparison and evaluation The five subsequent chapters take each city in turn briefly reviewing the salient characteristics of each one before presenting an account of how planning and design policy have evolved in the last twenty five years key features of the contemporary systems of design control are highlighted and a summary evaluation is made The focus in the case studies is on how policy and guidance have been formulated structured and presented in the various documents that make up the policy framework how the process of control operates and how both respond to the criticisms commonly made of design and control This final chapter draws general conclusions about the experience of the studied cities of wider relevance to American design review practice but which are of interest to those engaged in design review and policy formulation everywhere

Design & Historic Preservation David L. Ames, Richard D. Wagner, 2009 This collection of papers addresses two questions central to design and historic preservation what are the parameters of compatibility in the design of additions to historic buildings and of new infill buildings in historic districts and landscapes Presented at the Third National Forum on Historic Preservation Practice A Critical Look at Design in Historic Preservation held at Goucher College the authors include practicing and academic historic preservationists architectural historians architects landscape architects and engineers Organized under the themes of Melding Contemporary and Historic Design Design Standards in Changing Environments Modernism and Post modernism in Preservation Design and Engineering and Preservation issues of compatibility are explored through diverse projects in locations across the United States from historic Charleston SC to downtown Los Angeles
