**USB Complete: The Developer's Guide, Fifth Edition** Jan Axelson, 2015-03-01 Developers who design and program USB devices have a new resource in the fifth edition of *USB Complete The Developer's Guide*. This edition adds an introduction to USB 3.1 and SuperSpeedPlus bus which offers a 2x increase in bus speed over USB 3.0's SuperSpeed. For designs that don't require USB 3.1's capabilities the book also covers USB 2.0 technology and applications. *USB Complete Fifth Edition* bridges the gap between the technical specifications and the real world of design and programming. Author Jan Axelson distills the fundamentals of the protocols and guides developers in choosing device hardware, deciding whether to target a USB class driver or another host driver and writing device firmware and host applications. Example code in Visual C shows how to detect and access USB devices and how to program and communicate with vendor defined devices that use the human interface device (HID) class driver and Microsoft's WinUSB driver. Also covered are how to use bus power including new advanced power delivery capabilities, wireless communications for USB devices and developing embedded hosts including dual role USB On The Go devices. Programmers and hardware designers can rely on *USB Complete's Fifth Edition* to help get projects up and running quickly. Students and hobbyists will learn how to use the interface built into every PC. Instructors will find inspiration and guidance for class projects.

**NHES, 91/93/95/96 Electronic Codebook (ECB) User's Guide** Mary A. Collins, Kathryn Chandler, 1997 The National Household Education Survey (NHES) is a random digit dial telephone survey of households developed by the National Center for Education Statistics. It has been conducted in 1991, 1993, 1995 and 1996 with varying components each year. The NHES 91/93/95/96 CD-ROM contains an electronic codebook (ECB) program that after being installed on a personal computer allows the user to examine the variables in each of the NHES data sets as well as create Statistical Analysis System (SAS) or Statistical Package for the Social Sciences (SPSS) programs to generate an extract data file for any of the NHES data files on the CD-ROM. The files include the 1991 and 1995 Adult Education files, the primary and preprimary education files from 1991, the school readiness and school safety files from 1993, the 1995 early childhood program participation file and the 1996 household and library parent and family involvement in education and civic involvement, youth civic involvement and adult civic involvement files. The ECB is a DOS based program for IBM compatible personal computers. Sections describe its contents and use, focusing on what can be done with the ECB and how to do it. Emphasis is on extracting information from the files. Eight appendixes provide specific use information and samples including SAS and SPSS samples. *PC Mag*, 1987-11-10 PCMag.com is a leading authority on technology, delivering Labs based independent reviews of the latest products and services.
