Performance and emissions data

Performance and emissions data for the R1040 series engine, showing torque (kgm) and power (kW) at various engine speeds (RPM).

Features

The R1040 series engine is a four-cylinder, four-stroke diesel engine with a displacement of 10.4 liters. It is designed for high performance and low emissions, making it suitable for a wide range of applications. The engine features a common rail fuel injection system, which provides precise fuel delivery and improved combustion efficiency. This results in higher power output and reduced fuel consumption. The R1040 series engine is also equipped with advanced emission control technologies, including a diesel particulate filter (DPF) and a selective catalytic reduction (SCR) system, to meet stringent environmental requirements. The engine is mounted on a robust frame, which provides excellent stability and vibration damping. It is also equipped with a variety of accessories, including a water pump, alternator, and cooling fan, to ensure reliable operation in demanding environments. The R1040 series engine is a versatile and powerful power source for a wide range of construction and industrial applications.
