Langol, Lee Whitmore, Tom Rudolph, Floyd Richmond, 2007-09 Alfred's Music Tech Series Sequencing and Music Production is designed for late elementary to high school students and can be used in groups or individually. No previous experience with composition or sequencing audio recording software is required. With Sequencing and Music Production, students will have a broader understanding of composing and recording music, become familiar with basic tools and techniques for recording MIDI and audio, manipulate and arrange multi-track audio, mix their own songs. Sequencing and Music Production is organized into four units, each including progressive and supplemental activities for practice and reinforcement. Topics include Unit 2 Rhythm Melody and MIDI Recording, Unit 3 Pentatonic Japanese Folk Song, Unit 4 Build a Song. *Intraocular Lens Calculations* Jaime Aramberri, Kenneth J. Hoffer, Thomas Olsen, Giacomo Savini, H. John Shammass, 2024-07-03. Cataract surgery, with 25-30 million surgeries per year, has become one of the most popular surgeries in the world. The calculation of its power is of utmost importance. As new premium intraocular lenses (IOLs) and modern surgical techniques have been developed, the demand has grown exponentially, not only for eliminating cataracts but also for getting rid of the need for glasses. This book offers a comprehensive overview of IOL power calculations and its various formulas and methods. Chapters discuss use of the diagnostic biometry devices that provide the measurements and the management of different clinical situations where particular modifications must be applied. Chapters also discuss the newest generation of multifocal and toric IOLs that can only be implanted if no residual refraction is planned for, which implies a perfect mastery of all the IOL calculation process. This book marks the first time in ophthalmological history that all the main leaders in the field have collaborated in a project that will undoubtedly be the reference for the next ten years. *Intraocular Lens Calculations* is a must-have resource for cataract and refractive surgeons as well as technicians and anyone dealing with this subject.

Explaining Risk Analysis Michael R. Greenberg, 2016-09-13. Risk analysis is not a narrowly defined set of applications. Rather, it is widely used to assess and manage a plethora of hazards that threaten dire implications. However, too few people actually understand what risk analysis can help us accomplish, and even among experts, knowledge is often limited to one or two applications. *Explaining Risk Analysis* frames risk analysis as a holistic planning process aimed at making better risk-informed decisions and emphasizing the connections between the parts. This framework requires an understanding of basic terms, including explanations of why there is no universal agreement about what risk means, much less risk assessment, risk management, and risk analysis. Drawing on a wide range of case studies, the book illustrates the ways in which risk analysis can help lead to better decisions in a variety of scenarios, including the destruction of chemical weapons, management of nuclear waste, and the response to passenger rail threats. The book demonstrates how the risk analysis process and the data models and processes used in risk analysis will clarify rather than obfuscate decision makers' options. This book will be of great interest to students and scholars of risk assessment, risk management, public health, environmental science, environmental economics, and environmental psychology.
