Chapter 3

Exercises

1. In Figure 3-10 the process of buying and planting flowers in the spring was shown using the same structures as the generic example in Figure 3-9. Describe some other process with which you are familiar using exactly the same logic.

Answer:

Student answers will vary widely. They should come up with processes that fit the generic logic shown in Figure 3-9. Some examples could include: making a dentist appointment or registering for a class. Pseudocode for each follows.

```
if it's time for your annual teeth cleaning
    call the dentist for an appointment tomorrow
    while the day and time you want isn't available
        if another time the same day is available
            make the appointment at the new time on the same day
        else
            pick a new day and time
        endif
    endwhile
    write appointment on your calendar
endif

if you are taking a class this semester then
    register for a class
    while the class is full
        if another section is available
            enroll for the available section
        else
            select a new class
        endif
    endwhile
    print schedule
```
