Instructor's Manual

Chapter Objectives

Chapter 3, *Computer Organization and Architecture*, is a course prerequisite of *Computer Systems: An Introduction to Modern Computing*. This chapter covers fundamental concepts and techniques for the computer architecture and organization. The chapter is divided into two main parts: *Computer Organization* and *Computer Architecture*. The *Computer Organization* part covers the internal structure of the computer, including the CPU, memory, and I/O. The *Computer Architecture* part covers the external structure of the computer, including the instruction set, the bus, and the system software.

This chapter should be covered after chapters 1, 2, and 4 through 6.

Students should learn the following concepts:

- Computer Organization:** Students should be able to describe the internal structure of the computer, including the CPU, memory, and I/O. They should be able to explain the role of each component and how they are connected.
- Computer Architecture:** Students should be able to describe the external structure of the computer, including the instruction set, the bus, and the system software. They should be able to explain the role of each component and how they are connected.
- Computer Organization and Architecture:** Students should be able to describe the relationship between the internal and external structure of the computer. They should be able to explain how the internal structure affects the external structure and vice versa.
