popularity of seaside resorts and sea bathing as a preferred form of leisure activity across the social and ethnic spectrums served an important role in shaping the racial relationship between Westerners and the Chinese population as well as the Chinese people's perception of the female body and the seaside during the colonial period. The popularity of British leisure forms in colonial Hong Kong does not necessarily mean the triumph of Britishness. This book will be of great interest to historians with an interest in leisure and in Empire and Colonialism as well as historians of Colonial Hong Kong and Modern China. Chinese Middlemen in Hong Kong's Colonial Economy, 1830-1890 Kaori Abe, 2017-09-14. The traditional view of the Hong Kong colonial economy is that it was dominated by Western companies notably the great British merchant houses and that these firms enlisted support from Chinese middlemen the compradors who were effectively agents working for the Western firms. This book which presents a comprehensive overview of the compradors and their economic and social functions over the full period of colonial rule in Hong Kong puts forward a different view. It shows that compradors existed before the beginning of British rule in 1842, discusses their economic and social roles in the colonial economy, roles which included activities for Western firms for the government and to support compradors' own commercial activities and outlines how the comprador system evolved. Overall, the book demonstrates that the compradors played a key role in the formation and development of Hong Kong's economy and society that they were active participants not just passive servants of Western companies.
