

Got Water?

What is the hydrosphere?

The **hydrosphere** is the part of Earth that is liquid water. Ninety-seven percent of all of the water on Earth is the saltwater found in the oceans. Oceans cover 71% of Earth's surface. The hydrosphere also includes the freshwater in lakes, rivers, and marshes. Rain and the water droplets in clouds are also parts of the hydrosphere. Even water that is underground is part of the hydrosphere.

The water on Earth is constantly moving. It moves through the ocean in currents because of wind and differences in the density of ocean waters. Water also moves from Earth's surface to the air by evaporation. It falls back to Earth as rain. It flows in rivers and through rocks under the ground. It even moves into and out of living things.
