- To wipe excess liquid that may accidentally splash, an absorbent cloth or paper towels should be used.

NOTE: If glass is involved, do not attempt to clean spill by hand. Tweezers, needle holder or another instrument should be used to pick up glass prior to cleaning

Environmental surfaces should be decontaminated with a 1:10 solution of 5.25% sodium hypochlorite in water .

NOTE: These disinfectants are highly caustic unless properly diluted. In addition, disinfectant solution is intended for use on environmental surfaces only, since it can damage instruments and equipment and skin damage.

When there are large spills of cultured or concentrated infectious agents, such as in the clinical laboratory setting, the contaminated area should first be flooded with a liquid disinfectant then physically cleaned and decontaminated with a hospital approved disinfectant. Gloves, gowns, masks, and safety glasses should be worn for cleaning large spills of blood or body fluids.

13.4 Decontamination of Patient Clothing and Personal Belongings:

Patient clothing and personal belongings that become contaminated by blood or body substances should be handled according to the following procedures.

13.4.1 Clothing

Clothing soiled by blood or body substances should be placed in a tightly sealed plastic bag at the patient's bedside and given to the family for home laundering. The family should be instructed to wash the clothing by machine, using a laundry detergent. Hot water and chlorine bleach should also be used unless these agents will damage the items. The plastic bag used to contain the clothing during its transport should be placed in a second plastic bag, tightly sealed, and discarded in the household trash. Persons involved in the handling of contaminated clothing should be instructed to wash their hands thoroughly after handling the items.

13.4.2 Personal Belongings

- Disinfect hard surfaces by wiping the items using a 1:10 solution of 5.25% sodium hypochlorite in water (1 part chlorine bleach to 9 parts water).
- Disposable articles, such as magazines, that are contaminated by blood or body substances should be disposed of according to the hospital's regulated and non-regulated waste policy.

Handbook of Laboratory Health and Safety Measures S.B. Pal,2013-03-14

During the past two decades many books governmental reports and regulations on safety measures against chemicals fire microbiological and radioactive hazards in laboratories have been published from various countries These topics have also been briefly discussed in books on laboratory planning and management The application of various scientific instruments based on different ionizing and non ionizing radiations have brought new safety problems to the laboratory workers of today irrespective of their scientific disciplines be they medicine natural or life sciences However no comprehensive laboratory handbook dealing with all these hazards some of which are recently introduced had so far been available in a single volume Therefore it was thought worthwhile to publish this Handbook on safety and health measures for laboratories with contributions from several experts on these subjects As this second edition of the Handbook like the first edition is a multi-author volume some duplication in content among chapters is unavoidable in order to maintain the context of a chapter

as well as make each chapter complete An attempt has also been made to maintain the central theme which is how to work in a laboratory with maximum possible environmental safety *National Library of Medicine Current Catalog* National Library of Medicine (U.S.),1982 **Handbook of International Electrical Safety Practices** Princeton Energy Resources International,2011-01-06 A valuable and comprehensive safety reference for any organization working with or around electricity This comprehensive guide informs working professionals in multiple industries such as manufacturing processing or energy about safety procedures that should be used on the job It informs the reader about the hazards in the work place and what to do to make sure he she is protected The Handbook of International Electrical Safety Practices presents readers with the proper organizational skills needed to avoid hazardous injuries details environmental monitoring techniques and discusses how to ensure that proper protection is used on the job The authors cover not only obvious electrical safety considerations such as exposed wires and evacuation plans but everything related to electrical safety such as air quality sound level and radiation This reference provides the most comprehensive coverage for any company to keep employees informed and to keep their work environment safe The Handbook of International Electrical Safety Practices Contains working plans and templates for evaluating safety procedures and conditions in the plant Covers common hazards and how to avoid them such as radiation noise air quality fire and electric shock Gives a comprehensive view of workers rights and international regulations Goes beyond regulations and laws to provide a workable blueprint for creating a safe industrial environment Professional Beauty Therapy: Australia and New Zealand Edition with Onli Ne Study Tools 12 Months Lorraine Nordmann,Andrea Day,2017-11-23 The toolkit with the knowledge and skills you need to successfully practice beauty therapy Professional Beauty Therapy is the industry bestseller This third Australian edition now addresses significant changes to help you achieve your qualification Professional Beauty Therapy provides you with the specialist skills knowledge and current trends you need to give you that professional edge This title covers the common core competencies of the Certificate IV and Diploma and an additional 23 competencies **Athletic Training Clinical Workbook** Kim Miller-Isaac,Melissa Noble,2014-07-17 A one of a kind workbook for certification exam success Waiting in the training room Have downtime on the field Take this portable workbook with you wherever you go to confidently prepare for the competencies required by the BOC and meet the challenges you ll face in clinical and practice **Administering the School Library Media Center** Betty J.
