After the Software Wars Keith Curtis, 2009 Computers are an advancement whose importance is comparable to the invention of the wheel or movable type While computers and the Internet have already changed many aspects of our lives we still live in the dark ages of computing because proprietary software is still the dominant model One might say that the richest alchemist who ever lived is my former boss Bill Gates Oracle founder Larry Ellison and Google co founders Sergey Brin and Larry Page are close behind Human knowledge increasingly exists in digital form so building new and better models requires the software to be improved People can only share ideas when they also share the software to display and modify them It is the expanded use of free software that will allow a greater ability for people to work together and increase the pace of progress This book will demonstrate that a system where anyone can edit share and review the body of work will lead not just to something that works but eventually to the best that the world can achieve With better cooperation among our scientists robot driven cars is just one of the many inventions that will arrive pervasive robotics artificial intelligence and much faster progress in biology all of which rely heavily on software Publisher *Mac Life*, 2008 MacLife is the ultimate magazine about all things Apple It's authoritative ahead of the curve and endlessly entertaining MacLife provides unique content that helps readers use their Macs iPhones iPods and their related hardware and software in every facet of their personal and professional lives

Design Is How It Works Jay Greene, 2010-07-29 It's not just what it looks like and feels like Design is how it works Steve Jobs There's a new race in business to embrace design thinking Yet most executives have no clue what to make of the recent buzz about design It's rarely the subject of business retreats It's not easily measurable To many design is simply a crapshoot Drawing on interviews with top executives such as Virgin's Richard Branson and Nike's Mark Parker Jay Greene illuminates the methods of companies that rely on design to stand out in their industries From the experiences of those at companies from Porsche to REI to Lego we learn that design isn't merely about style and form The heart of design is rethinking the way products and services work for customers in real life Greene

explains how Porsche pit its designers against each other to create its bestselling Cayenne SUV Clif listened intently to customers resulting in the industry changing Luna energy bar OXO paid meticulous attention to the details turned its LiquiSeal mug from an abysmal failure into one of its greatest successes LEGO started saying no to its designers saving its brick business in the process Greene shows how important it is to build a culture in which design is more than an after the fact concern it s part of your company s DNA Design matters at every stage of the process It isn t easy and it increases costs but it also boosts profits sometimes to a massive extent In an increasingly competitive marketplace design represents the best chance you have of transcending your competitors **iPod, YouTube, Wii Play** Dr. Brent Laytham, 2012-10-10 Should Christians w00t or wail about the scope and power of modern entertainment Maybe both But first Christians should think theologically about our human passion to be entertained as it relates to the popular culture that entertains us Avoiding the one size fits all celebrations and condemnations that characterize the current fad of pop culture analyses this book engages entertainments case by case uncovering the imaginative patterns and shaping power of our amusements Individual chapters weave together analyses of entertainment forms formats technologies trends contents and audiences to display entertainment as a multifaceted formational ecology
